HB 412

RE: Lemon Law

HB412

Dear Legislators,

Some bills are worthy of consideration and possibly altered to address all parties concerns. This bill should be killed with no further action.

Manufacturers, for the most part, all have one year warranties. If this bill is passed, their obligation to the consumer would go to two years. Manufacturers would have reluctance about doing business with Montana dealers.

In the many years that we have been in the RV business, never have we had to resort to litigation to resolve an issue. Warranties have been adequate enough to cover most concerns that consumers have.

If I was aware of numerous problems not being addressed by the RV manufacturer, I would agree that legislation should be considered, but that just isn't the case. What issues one person has should not create burden for the rest of the RV industry.

Thank you,

G. Ron Pierce
