A Pteranodon's long narrow wings were simil
to the shape of a ocean soaring bird. I wonde
if a Pteranodon ever looked like an other wi
animal.

but very few steps on it's feet. Also it moved using wings. It would be funny if a Pteranodon run into a tree while it was flying. A Pteranodon eats flowers and fish that means it is an omnivore. It would be awful if a Pteranodon choked on a flower.

A Pteranodon's head length was 7 feet and it's wings length was 23 feet across. It was interesting that a Pteranodon was
