Welcome to Fort William Henry Harrison. Whether you are visiting the installation for the first time or are a return visitor, we hope your stay is enjoyable. This brochure was developed to provide you with some of the most-requested information about Fort Harrison. If you are interested in other publications about the installation, inquire at the Training Center Headquarters, Building 1011. These publications are also provided in on-post temporary officer and senior enlisted quarters (BOQ #1 and #2).

Fort William Henry Harrison was established by act of Congress and through the efforts of the citizens of Montana through donations of land in 1892 near the State Capitol of Helena, with the first permanent construction completed in 1894. It was an active US Army post from 1892 to 1913 when it was abandoned. The original fort is now the Veterans Administration Hospital. North of the hospital is the current military complex.

A variety of military units have been stationed here, most notably the 24th and 25th Infantry Regiments (Buffalo Soldiers), the First Special Service Force (Devil's Brigade) of World War II fame, and the 163d Infantry Regiment (the Jungleers) of World War II Pacific fame.

Since the end of the Korean War, Fort Harrison has been the primary training area of the Montana Army National Guard. Fort Harrison consists of approximately 5,400 acres of training areas that include 10 live fire ranges, a Hand Grenade Qualification Course and a MOUT Assault Course (blank fire only). Also, in support of Fort Harrison is the Limestone Hills Training Area (LHTA) located near Townsend, MT, that consists of 23,000 acres of training areas that include 17 live fire ranges.

While visiting Fort Harrison, we ask that you follow our post policies.

Please stay within the cantonment area as illustrated on the reverse. Once you leave the black top roads, you enter troop training areas and ranges. Private vehicle or rental cars are not authorized in the training ranges located to the West of the cantonment area. Running is not allowed on the range roadways without prior clearance with Range Control (324-3638 or 3355) Stay away from areas marked "off limits".

Observe all posted speed limits and regulations. Seatbelt use is required. Drivers must expect to encounter pedestrian traffic, runners, and cyclists on Fort Harrison's streets, roads and trails. Drop your speed to 10 mph when passing marching formations or running soldiers, and pass with the utmost caution after verifying the roadway ahead is clear. Cyclists will adhere to the normal traffic rules of the road and wear approved protective headgear. Personnel will face oncoming traffic when running or walking on streets or roads. Personnel will not wear portable radios, CD players, etc with headphones, which may interfere with hearing approaching vehicles while moving on or crossing any road or street. During hours of darkness or low visibility, personnel running, walking, or cycling while conducting voluntary physical training or recreational activities on or around Fort Harrison's paved streets, roads and trails will wear reflective gear clearly visible from both front and rear. Reflective gear may be purchased at the PX.

Smoking is prohibited in all buildings. Smoking is permitted outside most buildings in designated areas.

Please do not litter or harass the post's wildlife. Hunting is not allowed on post. Personal firearms or weapons are not authorized to be in your possession or vehicle on Fort Harrison.

The Billeting Office is located in building 1011, open 0800-1700 hours, Monday thru Friday except holidays. Call (406) 324-3355 to make reservations during duty hours only. Please plan ahead for getting your reservation. Keys will be placed in mailboxes for after-hours pick-up. Ask for your combination. All registered occupants are required to pay the established charge until the day their key is returned. Check out NLT 1000 on the day of departure. For key problems, call the emergency after-hours # (406) 431-8491 after 1800 hours every day.

Pets are not allowed in any transient quarters on the installation. Kennel accommodations are available in the area, information available upon request
