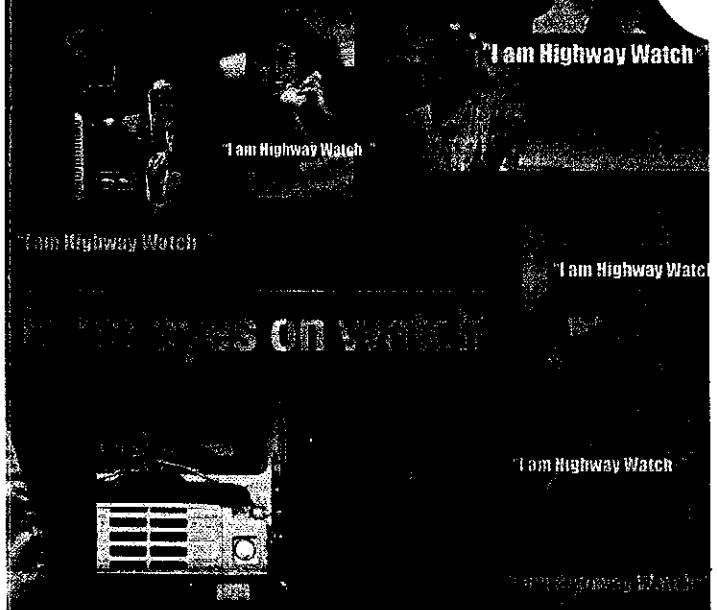
Anti-terror training hits the road



Highway Watch® helping to keep the transportation industry safe and secure

WHAT IS HIGHWAY WATCH®?

Highway Watch® is the highway sector's national safety and security program that uses the skills, experiences, and "road smarts" of America's highway transportation workers to help protect the nation's critical infrastructure and the movement of goods, services, and people. In addition to promoting safety, this program helps transportation professionals learn to be aware of their equipment and workplace to 1) avoid becoming a target for terrorist activity and 2) avoid having their equipment become weapons of terror.

Administered by the American Trucking Associations (ATA) under a Cooperative Agreement with the U.S. Department of Homeland Security (DHS), Highway Watch® engages the highway sector's leading organizations to provide safety and security training to hundreds of thousands of transportation workers throughout the country.

A national program with state implementation, Highway Watch® relies on the expertise and relationships of the of the nation's leading highway transportation organizations to mobilize a sector and make our country's highways safer and more secure.

Highway Watch® is not a substitute for the existing 9-1-1 system. It is a program that [illegible] participants to [illegible] 9-1-1 in life-threat[illegible]ncies [illegible] Highway Watch® as a s[illegible] in [illegible] reports to both 9-[illegible]ay [illegible]

To serve this effort, Highway Watch® focuses on the following five objectives:

PROGRAM OBJECTIVES

1. Prevent commercial vehicles or cargo from being used as weapons against Americans.
2. Protect the Nation's critical infrastructure of bridges, tunnels, and other potential terrorist targets.
3. Provide critical security data from the highway environment for information sharing and analysis.
4. Promote important safe driving skills and habits.
5. Improve coordination with Federal, State, and Local emergency management, public safety, and law enforcement officials.

HOW DOES HIGHWAY WATCH® WORK?

Highway Watch® contains three main components: Training and Recruitment, Information Sharing and Analysis, and Operations Support.

Highway Watch® participants - transportation infrastructure workers, commercial and public truck and bus drivers, and other highway sector professionals - are [illegible] trained by security professionals, [illegible] and other expert personnel to [illegible] security threats as well as safety hazards on [illegible] participants partner with law [illegible] additional "eyes and ears" of [illegible] transportation industry by using their [illegible] to report out of the norm [illegible] incidents in a timely and [illegible] manner.

[illegible] the Highway [illegible] participants receive a unique [illegible] number that they can use to contact [illegible] Call Center to report a [illegible] The Call Center [illegible] and routes [illegible] response agency.

The Highway Watch® Call Center provides specially trained operators to assist in collecting reported information and connecting the call to the responsible public safety officials. Moreover, these reports are forwarded to the Information Sharing and Analysis Center (ISAC) where industry analysts can look at all the security reports made across the nation to see if any patterns or similarities develop.

The Highway ISAC analysts work closely with Federal counterparts to review information and communicate alerts, bulletins, and BOLO requests ("be on the look out") to the highway sector as needed.

As daily communication with state and national [illegible] becomes more integrated [illegible] Highway Watch® Operations [illegible] working relationships [illegible] safety officials, private industry, and Federal [illegible] These relationships will serve as additional vehicles in information gathering and dissemination in times the transportation sector needs to be mobilized when responding to a regional or national crisis.

[illegible] millions of miles of highways, vast expanses of [illegible], tunnels, and overpasses — America's [illegible] transportation infrastructure and its highway [illegible] comprise the backbone of the nation. High[illegible] professionals [illegible] systems [illegible] with each and every mile.

He[illegible] America. Become part of the Highway Wa[illegible] today!
