Senate Energy & Telecomm.Comm
Exhibit No. 18
Date 2.15.05
Bill No. SB 415

Proposed amendment to SB 415

To add a new subsection (11) to Section 4, as follows:

(11) A public utility must provide transmission, distribution, billing, load balancing, brokering and any other ancillary services, for a reasonable fee, to any certified small producer of electrical energy within Montana that sells its electrical energy to a customer within the distribution area of the public utility. A certified small producer is an entity producing between 25 kilowatts and 1.5 megawatts of electrical energy from an eligible renewable resource established in subsection 3(6) and certified by the commission.
