SENATE FISH AND GAME
EXHIBIT NO. 4
DATE 2/1/05
BILL NO. SB 298

We, the undersigned, believe that the new Ft. Peck fish hatchery should be used to support every major game species found swimming in the waters of Fort Peck Lake. The existing fishery consisting of Walleye, Northern Pike, Lake Trout, Chinook Salmon, Crappie, Perch, and Bass, provides incredible fishing opportunities for the multi-species fisherman. If any of the for-mentioned species are in need of help due to drought, fishing pressure, disease, or any human caused or natural disasters, the new hatchery should be used to its full capacity to help that species as needed.
