Exhibit No. 10
Date 2-15-05
SB 416

SOME QUESTIONS OF THE DEPARTMENT BEFORE EXECUTIVE ACTION IS TAKEN ON SB 416

How many out of state support orders were issued in 2003-2004?

Of these, how many resulted in drivers' licenses being suspended?

How many suspensions resulted in support orders being signed?

Of the support orders signed, how many followed through, and how many defaulted because the plans were too onerous?

How many refused to sign payment plans because they did not agree to the waiver of their rights, as spelled out in the payment plans

How many of the obligors whose licenses were suspended were on public assistance?

How many arrearages were collected as a result of using drivers' licenses suspensions as a collection tool?

If the Department has not done so already, I respectfully request that they maintain statistical information regarding the frequency of license suspension by type of license and the amount of child support collected in cases where license suspension is utilized as a collection tool.
