RE. HB324

Exhibit No. 14
Date 3-10-05
Bill No. HB 324

My name is Marilyn Hatch and I live in Lolo Mt. Twenty-six years ago I had an abortion. I have suffered tremendously, tortured, and tormented living with the guilt and shame of having had my baby killed. Over the next 10 years I wrote letters and phoned legislators and congressmen, spoke one on one with people, attended meetings, candlelight vigils, called talk-shows volunteered at crisis pregnancy centers and sidewalk counseled all in an effort to change the hearts and minds of people about the wanton slaughter of children and women in our country. Having done all that, the bodies at that time, piling up, numbered about 25 million babies. I became involved in "Rescuing" laying my life down between the woman and the abortionist. One last ditch effort, going the extra mile in an attempt to save that babies life and the life and pysche of the woman. Jailed over and over and over again for exercising my 1st Amendment right I've continued to plead for the women and the babies. Today I'm here to plead with you not to pass this bill discriminating, targeting a people group whose faith and love for human beings, human life, human rights, the right to life and love for God's Law drives us to be there for them offering the information, the truth the options and alternatives that they are not getting from inside, always wondering how different my life would have been if someone either inside or outside would have told me the truth.

I met a woman named Joy Davis years ago. She had worked for an abortionist in Alabama. In Mississippi this same abortionist had killed a 14 year old girl. At the time she was with us in front of the mill in an attempt to get media attention drawn to this sorry situation. This abortionist was being investigated in Mississippi, and still butchering babies and moms in Alabama. Joy, while working for him in Alabama had a woman die in her arms. That was the final straw for her. She Quit!! She proceeded to open her own clinic and was going to do things different. She determined to check peoples health, because if they had any health problems it was an added risk. She informed them of the risks and complications of abortion. They were informed about the development of the baby and were shown sonograms and ultrasounds. She learned a very quick lesson, when the women had the information they left without buying an abortion. She soon went bankrupt and had to close her clinic. We go to these death camps in hopes of doing the job that isn't being done by law enforcement and legislator's. The ones who take an oath and are paid by the taxpayers to protect and serve. ie: Montana Code Annotated 50-20-110 Reporting of practice of abortion Section 3. Let's have proof that ones being enforced. You really expect me to believe that the fox is guarding the chicken coop. Also Montana Code Annotated 41-1-103 - Unborn children- A child conceived but not yet born is to be deemed an existing person, so far as may be necessary for it's interests in the event of it's subsequent birth. And Montana Code Annotated 49-1-101 Right of protection from personal injury.

We are out in front of the abortion mills because even though the cute little blonde girl representing Naral last year says no women have died since Roe vs. Wade we know better. Either I misheard her or she is out and out lying or sadly and willingly misinformed. Lime 5, is a book written by Mark Crutcher. It has documented and spelled out in graphic and often stomach turning details the truth about

What is happening inside these mills. The deaths the many deaths, way more dead women than before abortion was made "legal" because there are way more abortions happening. Read Page 69 of Lime 5 by Mark Crutcher .
If you have the courage visit the website Life Dynamics .net to see the Blackmun Wall. You will see the names of women killed by "safe and legal " abortion. The abortion industries dirty little secret. Named after Supreme Court justice Blackmun who wrote the Roe vs. Wade decision. It's just the tip of the iceberg.
We are out in front of those "clinics" to say there is a Breast Cancer abortion connection. Twenty-eight studies have proved it so. When will these groups who claim they are for women tell that truth?
We are in front of the abortion mills because abortionist's are being caught harboring pedophiles. There's been an investigation accusing abortion provider's of violating state law's that require the reporting of child sexual abuse. Proof has been compiled that Planned Parenthood and the National Abortion Federation are consistently violating the law. Lawsuits are being filed, and school districts have been notified of their risk of legal liability should they continue to work with abortion providers.
We are in front of the mill's because women are being sexually assaulted, raped and impregnated and then aborted at these mills. Read pages l00, 101, 102 of Lime 5 by Mark Crutcher if you dare.
We continue to be there because now the dead baby count is approximately 45 million or more and to the peace –nicks who are generally for abortion that's more than all the war dead in our history combined.
So in conclusion we are there and hope to continue to be there because someone needs to tell the truth so they can hear the truth and make an informed choice. I believe this bill is no less than another attempt to shut us up because we are telling the truth and the truth is BAD for abortion business.

Thank You

Marilyn Hatch

P.S. Public servants who look the other way when part of the public they claim to serve is being "legally " slaughtered are not worthy of public office!!!

2005 Montana Legislature

AFFIDAVIT

House Bill 324

KNOW all men by these presence that I, Marilyn Hatch, am and have been present at the Blue Mountain "Clinic" on the sidewalk in Missoula, Mt. for the last 18 months and

WHEREAS, the Blue Mountain Clinic is situated at 610 North California Street

WHEREAS, Mindy Opper has given public testimony that subscribes that individuals protesting abortion at Blue Mountain Clinic had blocked someone from entering the clinic driveway and that we had told a family that children are killed inside.

WHEREAS, the UNBORN CHILD is not capable of speaking up on this issue, but is nonetheless the victim of the abortion and the focus of the protest, and

WHEREAS, some of the personnel of Blue Mountain Clinic would infringe on the First Amendment Right to free speech exercised by the Law-abiding individuals who choose to exercise those rights in favor of the UNBORN CHILD while on the public sidewalk in front of Blue Mountain Clinic

THEREFORE,

1. Let the testimony of Mindy Opper, a proponent of HB 324 be stricken from the record as false, accusatory and inaccurate. The only cars that block the driveway are clients cars receiving or giving the sidewalk counselors and picketers information.
2. Let the Montana Standard, The Missoulian newspapers and Mindy Opper of Blue Mountain Clinic be advised that the suppression of Constitutional and civil rights, false allegations and possible defamation of character are prosecutable offenses that can be sought by the citizens on the sidewalk who have respected the law in this situation and have parked well away from the gate of Blue Mountain Clinic.
3. Let it be recognized that Mindy Opper as a representative of her medical profession has through the use of obsene words and gestures shown herself much less than a professional by any standard of ethics and has proven through her "public testimony" on HB324, that she is even willing to lie to perpetuate the murdering of innocent unborn children to her personal benefit. Mindy Opper's testimony should be stricken from the public record and she should be sanctioned from testifying in any further hearings regarding this issue based on a definite conflict of interest in these matters.

Marilyn Hatch
