COMMENTS:

SJ 10 Deserves the Committee's favorable consideration. Since enactment of Public-Law 95-150 and the setting aside of a million acres of public land for wilderness study, active forest management has dropped dramatically. The timber industry in Montana has witnessed the closure of 22 sawmills and the loss of thousands of jobs. Multiple land use was intended "to furnish a continuous supply of timber for the use and necessities of citizens of the United States." Instead - the U.S. imports 40% of the wood fiber consumed daily. This needs to change. SJ 10 would be a good place to start - thank you for your attention.
