"Understanding Human Nature"

The following exhibit was submitted by Mike Barrett – *poet.* Mr. Barrett puts forward an assortment papers, some partial snips of papers others on 8 X 11, the smaller portions have been photocopied onto larger pieces of manuscript for research. There is no sequence or order to this information. The original exhibit is on file at the Montana Historical Society and may be viewed there.

[A quite probable ancient fact: the origin of the 12 month calendar at 1600, because of fundamental primary reality observations, 16 facts: earth, air, water, fire; light, dark; hot, cold; hard, soft; wet, dry; 4+2+2+2+2 + 4 spatial descriptions: in, out; up, down, = 16... Also, the first dictionary (1604) + the grammatically consistent St. James Bible in 1616 & 1618, those three facts temporally similar to the later 19th c. inventions of the telegraph, lightbulb, + phonograph, of orderly creative process, interactions of human nature.

(In summary) In immediate & long range planning, the answers here for the present & future generations to prevent escalating violent trends, of war every 14 yrs.-averagely-since the civil war (10 U.S wars); innovations are founded on belief in the certainty of a potentially perfectly orderly Universe & non-violent civilization, evidenced by-though muchly obscured from hundreds of yrs. of violent incidents & wars maladaptive influences- the fundamental environmental truth that consistencies of crop & biologic growth, the 4 seasons (equinoxes), proves orderly goodwilling control of universal growth & orbital energies in interactions of entities here eons before humans, & also evident by consistent weather patterns, & inversely global freezing trends (ice age), that natural warm systems of orderly energies established eons ago (cold snows, & cooling precipitates, *(also)* are very imbalanced by recent decades of billions of hours of cool air conditioning. Fundamental sensitive, orderly, goodwilling cat & dog noses & bug antennaes in naturally warm climates are badly confused conciousnesses & universal energy interactions (probably also ants 'monitor'-sense-those cool nerves energies, & also are confused). Certainly, to discontinue the ice age, warm (72° low limit) air conditioning customs for all rooms globally (except long driving). Significant change solves significant problems; so much for the chagrin of the 'do-nothing-different' conservatives & their apathy & ignorance of the fundamental truths preceding, & further, protect those goodwilling sensitive (overtime) entities & farm the southern hemisphere, happier fish & hippopotomuses & quadrupeds will grow all sorts of crops abundantly if we hunt large lizards & large cats (secondly) until they're extinct (in other smaller, non-destructively violent, more efficient, smaller harmless lifeforms' transformations) Energy is pervasive in conciousnesses & biologies from early in history & the universe, of human nature. As a poet, from months (too long) on the road hitch-hiking in the late & mid '70's disco-party era, & over 20 yrs. in the Rocky Mtns.- watch & look long enough, see some % of clouds are conciousnesses here eons before all of us, & with pints & quarts of wines & beers & exercise consistently, moderately, more communications for changes & prevention of loses of control from excess energy (do stretch & relax regularly), & more usually ordinary food, drink, & baths, prison systems & locks will become obsolete. It's environmental abuse of pervasive, billions of pounds & inches yearly, growth & orbital energies & conciousness interactions all about large lizards & large cats predator zones, of Arabia & Africa & some So. Pacific islands, & long captivities that are causing, forcing suicide bombings & other violence & disorders, all of which can be prevented, with progressive humanism & environmentalism, NON-violence, trust & reform.

Stretch + relax consistent calisthenics for self control of powerful pervasive natural growth + orbital energies + NON-human conscious-ness interactions here eons before us, of billions of pounds + inches yearly, to realize a perfect balance of control in human nature + the universe, with redundant good common sense advice, usually moderate, sometimes vigorous exercise, food + drink to return to happi-ness from the direct causes of violence, losses of self control from confusion, boredom, insomnia, misery, + instances of excess en-ergies + thoughtlessness, by variable exercise quantities + intakes, + availability of powerful somatic cerebral pints (or .5) of wine, of sunshine energies, should be common from Jr. h. school to forget about violence + shift to 'on-track' happiness + self control. Pervasive universal energies' control by no exceptions to driver regulations should include 'habit-transference' by sunlight + warm shirtless (nearly) 50 to 100 miles each of Jr. h.s. or adult sizes over a month (1 hr.-2 hr./day) or more to connect to 100% pure fundamental natural harmonious fundamental conciousnesses + energies; persist through the boring miles to the fun-flying bird, swimming horse + dolphin-happy dog miles... walking becomes as much fun as ball sports (bicycling's probably similar).

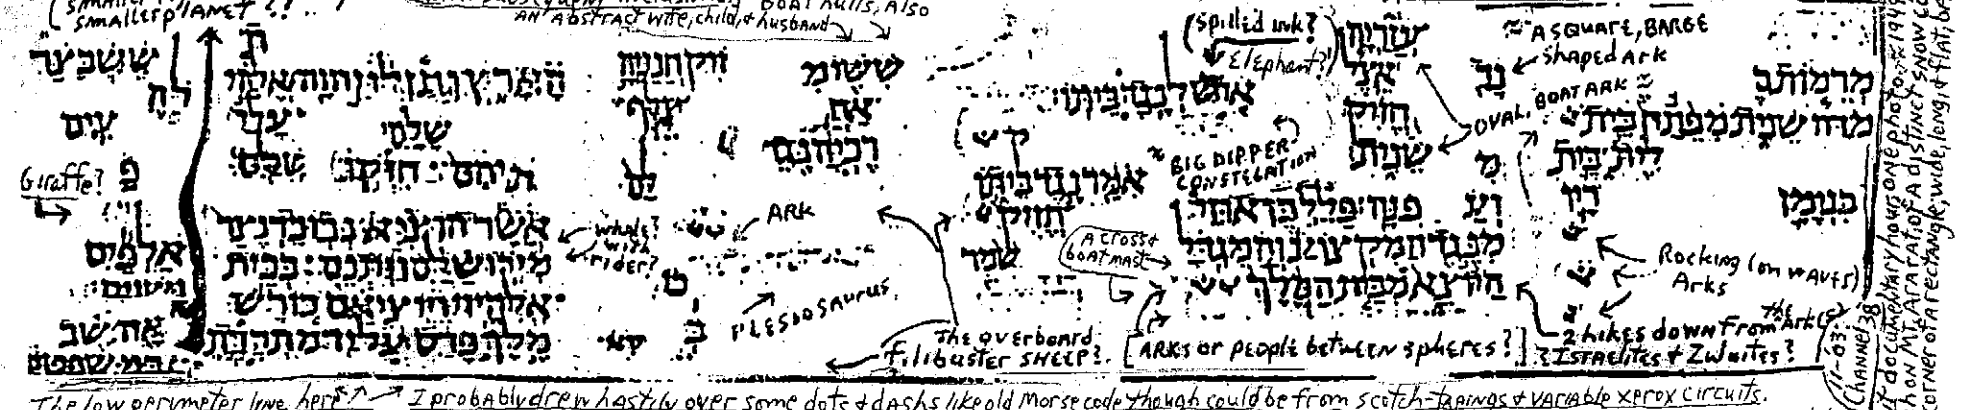
Without the intention of slander, rather circumstantial reasoning from my somewhat unique experience, circumstances, + traditional intelligent qualifications (see small print, low rt. margins) if you read here I believe I validly prove the government's majority of conciousnesses are thus far shut down and/or closed, deaf + dumb from metal fur trapping + multiple wars (10 by the U.S. in ± 143 yrs. previously) in lieu of the visual evidence above, consistent with the similar biologic consistency of DNA corroboratively + human experience, TV documentary resemblances clearer than some of the above single angle views; Lee H. Oswald resembles Tony Blair (Eng. P.M.) — + I wouldn't be surprized if they both resemble a U.S. serviceman who was decapitated by Japan in WW II prior to Hiroshima's bombing — Australia's pres. resembles a Nazi general who poisoned himself to death before he was to be hung at Nuremburg — with the INTENTION OF UNDERSTANDING, world leaders can learn about themselves + aren't isolated from self + or others' understanding (pop-psychoanalysis): in later life D. Webster (following the Alamo, 1836, see pictures above, resembles John Dillinger from an angular-profiled view (front on views + others vary by facial structural subtleties, though we're seldom told...), also, Pres. Bush, Dillenger both in youth played baseball + went nearly or overtly AWOL from the Navy + Air Force, + Dillenger's 10 yrs. in Joliet prison was from a hand-gun robbery attempt including firstly a bolt wrapped in a hankerchief or kerchief swung from behind which clearly (?) suggests frustrated communications of previous lifetimes difficult experience in memory + influence of + by the 1000's: environmental majority of conciousnesses here eons before humans which, no-doubt, invented, created our metabolisms + lifeforms, particularly of the Alamo where probably + certainly shootings, paralysis near babies in dirty diapers — bolts in a kerchief, + before, pleasantly perhaps, but then bayonettings + probably awful waits, then next lifetimes of more wars + the civil war soldier on ed. TV very resembling Pres. Bush, Dillenger, D. Webster in later life. Non-violence + militaries being occupationally, the sooner the wiser, shifted to farming the tropics by hunting large lizards + cats, discerning the very recent earthquake-tidal waves epicenter to be nearby, a median point between 4 large lizard + 4 large cat geographies, of pervasive universal energies cause + effects, + very similarly + statistically near-by African + Arabian + far-eastern peoples' calligraphically, non-linguistic + confused volatile temperaments...

The biblical cross wasn't intended for crucifixion, but was early primal farm-art: a dual birds nest, giraffe neck, scratcher ... [illegible]

... probably of ... universal energies ... in the cockpits in hijackers ... [illegible]

The excerpt below I found in a local library book (the 1st edition years ago, ≈1999 probably ≈ a 6 or 3:1 reduced size), an 'Illustrated Concordance of the Bible, an ancient scroll excerpt, of red 'ink', "the oldest known complete manuscript of the bible"... "11th century", Hebrew University Library, Jerusalem. I believe the ark in the ancient flood had a scroll 'log book'... important things have sentimental & survival value. In ≈1998 an hour documentary archeology TV show repeated a few times with very clear & significant evidence (visual & written) of that there were two arks, though they failed to include the very corroborative fundamental environmental truth, that consistency proves goodwilling non-human entites' universal & global conciousnesses & energy interactions evident in the orderly seasonal equinoxes & in quite consistent growth & orbital phenomena, & weather patterns, & also by the handle (an upside down ≈ boat hull shape) & 'square cup pattern of the stars in the "Big Dipper" constellation ('a willed memorial' of both arks from a smaller planet that flooded, which probably could still be by the 2nd star in the handle (& was visible, though my eyes aged in recently-a few-years ago). The documentary showed 2 arks, 1 frozen partially in the Mt. Ararat glacier, & broken in half & apart by ice; the other So. (& or w.?) of Ararat, 17 miles, an oval shape of petrified wood fragments as large as the Genesis description. 20th c. aerial photographs, & 19th c. multiple hikers' stories repeatedly in newspapers (one father & son brought back an ancient piece of wood planking, & descriptions of climbing on the deck) of a huge square shaped barge-ark, also ≈ matching the Genesis description. Glacial expansion, etc., have made the evidence mostly inaccessible, too difficult w/o improving weather (warm air conditioning to discontinue the ice age trends... Belief & will determine reality). Another archeology TV show, of underwater cement or stone ruins of perhaps the Alexandria, Egypt, lighthouse, showed an inscription of a bird outlined next to an angular 'round topped' leaning capital letter 'A' shape, probably of a view of the comet from the smaller planet's stone & more cement buildings, also 'telepoorted' magically with the 2 arks after the flood (& old ruins deep in covered earth)... a unique heiroglyph unlike any others, from some books & walls on TV-scrolls... I'm 55 yrs. old... looking at the impala, cat & giraffe shapes below, & the drifting Nautical oval & square ark & star dot shapes & patterns, & the recent majority governments' failing orderly control; I believe the log book is more certain in it from mostly, probably entirely, Zoah & the Zuluites (Negro-Afro-American-European) inspired origins of language, temporary conciousness merges of harmonious fish & birds, because of primal tropical health, & primal communications ('space-fish-doodles'), & also square cement pyramid building; rectangular scrolls: the Barge...

[My arrows & interjections & perimeter outlines, from a previous paper, 1999, by me & 2003 & before August '03 with subsequent inclusions.]



The low perimeter line here ↑ → I probably drew hastily over some dots & dashs like old Morse code though could be from scotch-tapings & variable xerox circuits.

[See large print to the right of the enlarged excerpt here: →]

↔ The Enlargement (left) is the 2nd figure down, 3rd column, of a wine glass & /or chandelier or tornadoe pattern. The few blank white spots were from my xerox copying, variable natural influences, probably from near-by pet stores' fish & birds perceiving clouds, etc., sometimes the fades were more cloudy & pronounced...

p.s. continuing... [Mike B., poet, etc., BA '70 MLS '74 of difficult history, anciently, a house of skulls in E. Europe before the Gutenberg & 1492 Parisian skulls disharmony]

Centered & to the right appears to be a corroboration of old films 'whale-fish memories on early Hollywood (?) film reels; pictures go magically appear on chemicals & paper, & whales, etc., have been eons longer in the universe of consistent phenomena-than us. A 'Black & white short scene (& few) of a barge-ark rolling through heavy long sea waves, also of a triple crucifixion & burn in an amphitheatre-entirely caucasions there-3 abstract cross figures, inter-connected, a kneeling figure & bird with a square wing, overlapped, with the small lizard figure opposite (left side) but also interconnected with a clear hammar-at-hand... the cross(s) was a dual birds' nest; giraffe neck scratcher; early farm tyranosaur possession. Tyranosaurie remedial exercise & wine, more usually ordinary food drink baths & moderate exercise to return to happiness & self control, prevent violence, with frequent redundant communications & other changes; more belief & less apathy; prisons will become unnecessary, obsolete, disassembled.

Nature has a long & particular memory (s)... I've got subtle nail indentions on the backs of my hands, a mild shroud resemblance; dozens of drowned spirits woke up on the cross, knock-ed out, caught the boat next day, conciousness dispersions about southern Europe, No. Africa or further... I've also upside down white rain drop shaped freckles & 3 red freckles on my lower left tribs, the pattern of the Big Dippers handle upside down. I sneeze a lot & my nose sniffles, got curled toes, weak knees, some ways (old) with my Ma & mostly of another, outside in the rain running Ma & boy child by a shut ark w/ others, Sam Johnson dictionary originals; near-by resemblences...

I probably levitated a fraction of a second making a lay-up in high school gym basketball... 2003 — over —

God - conciousnesses in the universe cons before humans - consistency - regular yearly equinoxes, crop & biologic growth - consistencies prove volitional control & goodwill; Universal Law, non-violence accumulates harmony, but, very evidently anciently & recently, violence accumulates escalating violent disharmony, and concerning the problem of an orderly comet, the environment has anciently & recently expressed - anciently, by ≈6 dozen pyramids, built in the tropics before there were any languages significantly developed - rudimentary sloping, potentially fireball rolling skyward angles & sides, primal energy concerned convictions of temporary conciousness merges (TCM's) of the builders with the ongoing 1000's:1 majority of entities here cons before humans, fundamental pervasive energies between all our ears, in conciousness, etc. - Also, the conjunctive climate failures around the Nile River-Desert - in old Egypt & in the Western U.S.A. Arizona, New Mexico ancient Pueblo Indian area deserts, of cause, & effects of energies in proximity to large predators (lizards & cats) overtime, the proof of overt pattern communications (OPC's), balanced triangular shapes, the contrary of tornadoe, tooth & nail shapes, of improving the stability & order of consistently proven volitional equinoxes, & interdependent energies influencing human behaviors, that we should begin farming of the tropics with large lizard & large cat hunting rather than militarization, as zebra noses & gill fish noses are accumulatively sensitive overtime, abused, & vastly influential of powerful 'equinoxal' & growth, cause & effect evident energies... recently expressed, more so of the 10 wars since the 19th c. U.S. civil war by the USA & others, being consequential of centuries of metal fur trapping abuse & limited conciousness & sensibilities there-by, interdependently of pervasive energies, c-e 9-11-01, more recently expressed by 3 cosmic universal matching pattern communications (c-ump-c), 2 in the weather, the 1st on 6-3-01 (10.7 weeks, ≈11 weeks before 9-11-01), the TV weather map showed a huge electric storm pattern between TN.-Alabama-Louisiana, & on the same map a huge cigar or tailless whale shaped thunderstorm pattern stretching from Florida (& the crocodilles' everglades) to Montana, then ≈2 yrs., 2 mos., 2 weeks later, ≈mid-August '03, (do you see the orderly, winter-summer 4 seasons volitional circumstantially clear & evident orderly but sometimes badly frustrated communications by entities here cons before humans?) the huge electric (& H_2O in Cleveland) power fades in the large cities of Albany, N.Y. A list of circumstantial facts proving the ash + cinder sun-moon-comet roasted surviving dinosaurs eons ago: wolves howl at the moon; through a fog, in winter daylight, the sun exactly matches the size + luminosity of the full moon; the moon matches the sun's daily arc, in parallel So.-West daylight early day settings at September equinoxes + also in the previous (+ probably most other) early Springtimes; the dinosaurs were reptiles, like birds (in the early universal energies), they were egg-prolific, there were million(s) of them, but only 5 or 10,000 dinosaur skeletons on the planet, + mountain zones globally are abundant with huge - some ¼ mi. long - elongated football shaped geologic forms, some of those have wide fan-tailed bases, triangular, of mammalian pregnancy origins, + most large boulders resemble digested dinosaurs, + some lie in alignment behind the huge 'earth-whale' forms; alka-seltzer remedies firey sore stomachs + upper digestive tracts; sea-shells, + fish fossils in mountain zones were 'spit up' by by earthwhales + /or from dinosaurs' stomachs; the flood anciently happened on a smaller planet, which used to be visible by the second star in the handle of the big-dipper constellation, in conjunction with a triple crucifixion + burn, there were 2 arks, a square + an oval boat + /or barge, Noah's (Israelites) + Zoah's (Zuluites), + Zoah wrote the ancient origins of language abstractly in the log book of the square ark (square cement pyramid stones + rectangular scrolls, + of primal health + primal communications then by conciousnesses here eons before us, inspired temporary conciousness merges, similar to 19th c. inventions of batteries, the telegraph, telephone, light-bulb + phonograph; consistent equinoxes, crop + biologic growth + weather patterns proves orderly goodwilling fish-bird-insects-quadrupeds' universal growth + orbital powerful + ancient + improving ((with changes)) energies + conciousnesses' interactions; some % of clouds are conciousnesses, by weather consistencies...) a T.V.-documentary ≈ 4 or 5 yrs. ago evidenced both arks: multiple 19th c. newspaper hiker's reports of the square wood ark on Ararat, aerial sightings with photographs in the 20th c., + an oval shaped, petrified wood outline of the biblical sizes laying ≈ 17 mi. south (e. or w.) of Ararat in a clearly delineated grass field, a view from above; ancient language origins, temporary conciousness merges also are evident in some letter shapes, N, M, o + a, + others' expressions of the earth forms, mountains, a predator tooth with a stick-in-the mouth (N') + the worrisome comet (a - crashed o), also expressed in architecture, the roll-back-ricochet shape of fireballs by the pyramids, before any language-significance clearly; some butterflies have white comet shaped spots on their wings; oceanic cuttlefish have octopus-like appendage shaped tongues to grasp + capture fish with extensions, + art forms can factually express conditions of reality, of inspired communications, as the science - not fiction - but fact, of the movie "Tremors" 'earth-whale, dinosaur-predator-entity, of snake's ancient ancestors; rock climbing smaller tyranosaurs' young + pterodactyl spirits' ongoing struggles; squirrels with red fringes on fur + arson from their memories by match factories, trees + history.

Non-violence accumulates harmony. Violence (+ revenge) doesn't solve any problems overtime.

(Full stops at stop signs + both-way looks - habitually weak hurried roll thru's will run red lights...)

Of unexceptional, calm, patient, alert driving, gradual, slower than quick accelerated starts at lights, curbs, traffic entries, speedometer glance frequently, if over, go under the speed limit, adjusted-balanced in the traffic flows; tailgating (failing a car length's distance per 10 mph) weakens stop + response reactions, + causes drivers' speeding into fog 'accordion' fatalities; more need respect for lifeforms, slower customs + regulations at hill-tops, curves, + night straight-aways. Break pedal reflex for every hill + curve to prevent attention fades. Watch for small dogs over hill-tops, night-straight-aways also. Never use drugs w/o food - if your stomach's empty 1 pill or 1 small glass of alcohol or 1 lungful of marijuana can cause near immediate unconciousness (pervasive natural energies + conciousnesses: the human minority of lifeforms...) Of relaxed, enjoyable, calm driving + stress (frustration) relief, walking, regular moderate exercise + sports, arts + civilization appreciation, contributing to society (more enjoyable work routines) stress relief, wine + baths, + more usually beer... for fresh air in public places (w/o tobacco); + wear seatbelts...

Significant (non-violent) changes solve significant problems (to perfect civilization). The previous, approximately a decade of global ice age freezing trends—the weather bureau apathetically mostly ignors or leaves to common sense is—no doubt—caused by excessive cool air conditioning use in natural warm climates, fundamentally orderly energy & conciousness interactions established eons ago by conciousnesses here before humans, evident in weather patterns, consistent crop & biologic growth & the equinoxes, the 4 seasons, cat & dog noses & bug antennaes also here eons before us, & those are certainly confused by air conditioning (except driving), & confusion overtime is abusive; yet they're sensitive, powerful & goodwilling, & warm, moderate 72° low limit air conditioning use can certainly return global climate trends to their fundamentally harmonious orderly climate conditions.

Of long range planning, now expand farming of the southern hemisphere. Irrefutably non-encyclopedically & fundamentally, happier hippopotamuses & fish will grow peanuts, potatoes, squash, beans & grains, etc. Truths are sometimes obscured by history, i.e. that energy is fundamental & pervasive in conciousnesses & biologies from universal origins, humans are an approximate thousands to one ratio minority to powerful—billions of pounds & inches yearly—growth & orbital energies & goodwilling bird-bug-fish-quadruped conciousnesses, which are overtime sensitive & neglected & abused by proximity to large lizards & cats, evidenced by [earth's more of growth energy than decay; fire only natural by lightning for bugs & old bones, of forest fires: monizor boxless] & since the climate failure in ancient Egypt, [also western U.S. Pueblo, Indian desert geographies] parasite-proof (healthier) underground crypts [shrunken heads around the tropics] recently a decade of multiple bombings & hackings & shootings there-abouts & [suicide bombers, the lone wanna-be, kamikaze, pilots, suicide bombers; head-on, auto fatals, Pearl Harbor, guillotines in Europe, North of triple lizard zones, S.E. Asia, Australia, Komodo's islands (& Indonesia)] historically (SE Asia has large lizards) far reaching abused orbital energies northerly, tornadoes in the USA probably originated in the 19th century from metal traps, bird cages, swirl plumbing & crocodile eggs, as there are no significant US Indian wall paintings of any tornadoes; also centuries ago Salem lynchings & of Admiral Hale along the East Coast, similar to 9-11-01's out-of-control incidents... Wishbone, the childrens program that played since the 1980's discontinued by Monday, sept. 10, 2001, the day before the crashes, Wishbone didn't show on early Monday evening [cosmically, inadvertently, I mentioned that fact on the local, No. Rocky Mountain community radio talk show, between Yellowstone & Glacier Nat'l parks environmental conciousnesses-influences-& the next day in Aug. 2003, the large cities power outages occurred in a collapsing pyramid pattern-Albany & N.Y. City, Ottawa-Toronto-Detroit & so. of Lake Erie, & Cleveland in the Sphinx spot w/o H_2O? It's clear, by pervasive energy, that the depressed captivity of fish & birds, particularly, in the TV audience & their grief & loss of belief in orderly benign entities (no Wishbone), interacting with the oppressed, eons w/ large lizards, & too long in zoos away from natural environments, affected confused radical destructive energies in cockpits... [conversely, 'evolutionarally', Universal Law is evidently, tersely, warm grows near-abouts the ground with fresh air, taste-buds (biologies are from the universe of earth, air, water, fire, + energy), slower driving (more respect for lifeforms at hill-tops & night straight-aways, particularly of countryside driving), walk & float obstetrics, & happy hippopotamuses & happy fish, & quadrupeds without large lizards & large cats much longer in eons of environmentalism—& the 20th c. is over, violent trends—facts—of the past decade approximately clearly indicate that the worst of history continues to repeat the worst of itself without significant changes, to solve significant problems, some of many, in the enclosed words.

I had hitch-hiked much between '76-'80, outdoors frequently in all sorts of bugsy-quadruped countrysides, if you've read carefully, or further, I prove nature (conciousnesses here eons before humans) has a long memory...
