We believe that Kindergarten had a big impact on our daughter, Nicolette. going full day benifited her by giving her more to work on projects and by preparing her for 1st - 12th grade. We believe that by showing her that school is fun and it prepared her for 1st grade because that is all day. She became more sociable and more interested in school by going to full day Kindergarten. Nicolette excelled in Kindergarten. Now she is ahead of her classmates and has been since Kindergarten. ~~We~~ think that all children should have that opportunity. And we believe it should start when children are young like during Kindergarten and before.
