Message:
Please consider the attached petition taken just last evening at a community gathering where the project was explained with architect drawings and mechanical engineering for the much needed energy upgrade.

The taxpayers who signed this petition request your support for the stimulus money under House Bill 645 that is earmarked for the energy update and renovation/restoration needed for a community center in the Old City Hall.

Exposing children to the arts is our biggest project and they will be the biggest winners in this project, as will all area citizens with workshops, seminars, plays etc. having a place to happen. Employment will be create during the project, and some additional permanent employment following it.

Our Senior Citizens, the ones most likely to access our archives and museum, cannot because there is no elevator. With our applications for funding, we would be able to complete all this project. We are able to break ground for it within the six month limitation.

Thank you for any consideration you can give us!

Copper Village Museum & Arts Center aka: Old City Hall
