COMMENTS:

It is important to recognize the fact that federal funding is still tax dollars returning to base budgeting in our school system was unsustainable last biennium + is unsustainable more now than ever.

We the people of Montana that pay the taxes to fund our University System need you to know we are not in a position to restore or enhance our personal funding. We have been far removed from resource development. In closing it was once said that it will be a great day in Montana when education has enough money + FWP has to hold a bake sale to buy a new picker.
