EXHIBIT 6
DATE 1/31/2011
HB 347

VOTE Natural Resource Production

I believe that the only wealth that any state has is their ability to produce the resources that are in the state's boundary. All service sector jobs and government jobs are a direct result of these resources.

Without their production, we have what we have– budget crises and unemployment.

VOTE Second Amendment Right

I believe that these rights were not granted to citizens of the United States of America to make sure that they get to target practice or hunt.

They were for the protection of our citizens. We need to preserve this right at all costs.

VOTE State's Rights

I believe that we need to take back our sovereign rights as a state in order to check the unlawful intrusion of the Federal government.

10th AMENDMENT 100%

VOTE Pro Life

It is my opinion that a human life starts at conception, and that there is NO excuse for Abortion. Period. It is not a contraceptive.
