SB 330

MontPIRG
MONTANA PUBLIC INTEREST RESEARCH GROUP

348 Corbin Hall
University of Montana
Missoula, MT 59801
(406) 243-2908

**To: House Federal Relation, Telecommunications, and Energy Committee**
**From: Montana Public Interest Research Group**
**Date: 03/21/2011**
**RE: SB 226 and SB 330**

MontPIRG students at the University of Montana are working to defend Montana's renewable energy policies and support increasing the Renewable Energy Standard to 25% by 2025. We call on the Montana State Legislature to reject SB 226 and SB 330 – two bills that undermine the progress made with renewable energy in Montana.

According to a 2010 report from Headwaters Economics, based in Bozeman, clean energy development provides the single best opportunity for new, high paying jobs in Montana. We should be encouraging more growth in the renewable energy sector to create jobs, spur economic growth and achieve energy independence.

The following are photo petitions taken at the University of Montana of students, staff, and faculty calling on the Legislature to generally encourage renewable energy and specifically to increase Montana's Renewable Energy Standard to 25% by 2025. SB 226 and SB 330 are in direct opposition to this vision for a clean, renewable, homegrown energy system.

Montana State Legislature

2011 Session

**Exhibit** 2

**This exhibit is colored photographs, which are scanned in black and white. The quality of the black and white scanning makes it difficult to view.**

**The original exhibit is on file at the Montana Historical Society and may be viewed there.**

# Petition In Support of Montana's Renewable Energy Standard

**WHEREAS,** the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

**WHEREAS,** Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

**WHEREAS,** Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

**WHEREAS,** electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

**WHEREAS,** clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

**WHEREAS,** wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

**WHEREAS,** Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

***THEREFORE,*** *we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

HEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan pport, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

HEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

HEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual roduction; and

HEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

HEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

EREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan port, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

HEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

HEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual oduction; and

HEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

HEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and rengthen our national security; and

HEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local overnments and royalties paid to landowners; and

HEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on o the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

# Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

## Petition In Support of Montana's Renewable Energy Standard

WHEREAS, the *Montana Renewable Power Production and Rural Economic Development Act*, passed in 2005 with bi-partisan support, has successfully put utilities on track to meet the target of 15% renewable energy by 2015; and

WHEREAS, Montana's wind capacity, since passage of the Renewable Energy Standard, has grown from 2MW to 386 MW; and

WHEREAS, Montana's wind resource ranks 2nd among the states for wind energy potential but Montana ranks 18th in actual production; and

WHEREAS, electricity from Judith Gap Wind Farm is the cheapest generation source in NorthWestern Energy's portfolio; and

WHEREAS, clean, renewable energy sources, such as wind power, protect our air and water, support family agriculture and strengthen our national security; and

WHEREAS, wind development brings economic development to rural communities through job creation, tax revenue for local governments and royalties paid to landowners; and

WHEREAS, Governor Schweitzer, Senator Jon Tester, Senator Max Baucus and Representative Dennis Rehberg have all signed on to the national 25x25 initiative to produce 25% of our energy with renewable energy by 2025;

*THEREFORE, we the community of the University of Montana, voice our support for Montana's Renewable Energy Standard, call on the Montana State Legislature to reject proposals that undermine or repeal the policy, and support efforts to increase Montana's Renewable Energy Standard to 25% by 2025.*

Dear house Federal Relations, Energy, and Telecommunications Committee,

Please vote For Renewable energy in The state of Montana, The Renewable Energy standard helps dozens of Businesses, creates hundreds of Jobs and demonstrates Montana's value of independence.

Renewable Energy is important to me because it is obvious that we can't keep using Gas and oil. Quit worring about making money and worry more about our Future.

Please oppose SB 109, SB 330 and SB 226, These Bills will severly hinder Montana's Renewable energy production.

Thank you,
Paul Ryan
1002 W. Pine St.
Missoula, MT 59802
paul.walker.ryan@gmail.com

Dear house federal relations, energy and telecommunications committee.

Please vote for renewable energy in the state of Montana. The renewable energy standard helps dozen of businesses, creates hundreds of jobs and demonstrates Montanais value of idependence.

Renewable energy is important to me because I know that ~~its~~ the foundation for making Earth happy and healthy.

Please oppose SB109, SB, 330 and SB226; these bills will severly hinder Montanais Renewable energy production.

Thank you for you service,

Sincarly,

Erika Berens
erikaboh@msn.com

Dear House Federal Relations, Energy, and Telecommunications Committee,

Please vote for renewable energy in the state of Montana. The Renewable energy standard helps dozens of businesses, creates hundreds of jobs, and demonstrates Montanan's value of independence. Renewable energy is important to me because cost effective, environmentally & socially just production of energy is the gateway to our future.

Please oppose SB 109, SB 330, and SB 226, as these bills will severely hinder Montana's renewable energy production.

Sincerely,

Larisa Carter
101 Knowles Hall Rm 265
Missoula, MT 59801

eric.mccollom@umontana.edu

Dear Congressman,

Please help Missoula build sustainable energy systems. like O'BAMA said in his State of the Union address, we need better infrastructure for the future.

Lets build a community center where we can recycle waste veggie oil from local BZN's and treat it and reuse to heat home and other buildings in our community, possibly fuel some diesel trucks as well.

If I can personally help you take on this task do not hesitate to call or write me. I am young and I have energy!

Sincerely,

Andrew Grossmann

Dear House Federal Relations, Energy, and Telecommunications Committee,

I urge you to vote for renewable energy in Montana. Our state is known for its intact ecosystems and health populations of fish and wildlife. As a fishing guide I've seen first hand how coal bed methane and other unsustainable energy sources have depleted wildlife populations in our neighboring states of Wyoming and Idaho. If Montana could employ sustainable energy for a percentage of its energy needs, the state would be setting an example for the rest of the country that states can exist without relying solely on foreign oil and out-of-state energy supply. Renewable energy is the only type of energy that can infinitely sustain our region. Please oppose SB 109, SB 330, and SB 226, this bills will hinder montana's renewable energy production.

Thank you for your service,

Sincerely,

Andy Simon

Dear House Federal Relations, Energy and Tele communications Committee,

Please vote for renewable energy in the state of Montana. The Renewable Energy Standard helps dozens of businesses, creates hundreds of jobs and demonstrates Montanan's value of independence.

Renewable energy is important to me because I believe our planet is at a cross roads. If we continue burning fossil fuels for our energy needs, we will (a) - soon run out, and (b) pollute our planet beyond a point of recovery.

When oil was first discovered as a potential energy source, I believe we made a mistake. We should have continued to explore and develop other avenues of energy instead of jumping on te oil wagon.

We can't undo what has been done, but we can work to turn te tide by developing solar, wind and hydro energies.

Please oppose SB 109, SB 330 and SB 226; these bills will severely hinder Montana's renewable energy production.

Thank you for your service,

Sincerely,

Please vote for renewable energy in the
state of Montana! The renewable Energy
tandard helps dozens of businesses, creates
undreds of jobs and demonstrates
ontanan's value of independence.

Renewable energy is important to me
ecause it will help preserve our environment
hat is so enjoyable in Montana. I would
ike to think we could be more independant of
ertain power companies. Also future generations
vill be glad if you vote for this.

Please oppose SB 109, SB 330 and SB226;
hese bills will severly hinder Montanas
enewable energy production.

Thank you for your service

Dear House Federal Relations, Energy, and Telecommunications Committee,

Please vote for renewable energy in our beautiful state.

The Renewable Energy Standard not only helps the environment, but would help with the creation of jobs & small businesses.

Please think solar, wind, biomass!

Thank you,

Christa Scherer

642 Sweeney Creek Loop

Dear House Federal Relations, Energy, and Telecommunications Committee –

Please vote for renewable energy in the state of Montana. The Renewable Energy Standard helps dozens of businesses, creates hundreds of jobs and demonstrates Montana's value of independence.

Renewable energy is important as a way for the U.S. to be energy independent, and to use the earth without abusing it. We should have done this 30 years ago!!

Please oppose SB 109, SB 330 and SB 226; these bills will severely hinder MT's renewable energy production.

Thank you!

Sincerely,

Danette Seiler
PO Box 752
Missoula, MT 59806

Dear House Federal Regulations, Energy, & Telecommunications Committee,

Please vote for renewable energy in the state of Mt. Renewable energy standard helps dozens of businesses create hundreds of jobs & demonstrates Mt's value of independence.

Renewable energy is important to me because

- Lowered Energy Costs & Environmental Damage
- Keep mining & other forms environmentally damaging companies out of Mts untouched wilderness areas
- Bring Jobs to Safe Alternatives than Coal/Retrol
- Not introduce any new Carbon into the atmosphere
- $$$ should be the only motivation for any politician & Keeping on Carbon is only appealing for Energy companies bottom line
- A small effort could cause an extremely important breakthrough in technology or public opinion

Please Oppose SB-109, SB-330, & SB-226

↳ these Bills will severly hinder Mts renewable energy production

Thank You for your Service

Dear House Fedral Relations, Energy, and Telecommunications Committee,

Why are you doing what you're doing?
Is it because you see the depth of beuracracy and know what needs to be done to get things done?.

Or, are you doing What you're doing because its what needs to be done to save humanity?

Money comes and goes (or is made and goes) but the effect we make stays.

Lead us to a better future.
Set our children up with a brighter future.
Give them Legitimate renewable energy
not just "qualifyable" renewable energy.

Tyler

Geographics

Dear House Federal Relations, Energy, and Telecommunications Committee,

Please vote for renewable energy in the state of Montana. The Renewable Energy Standard helps dozens of businesses, creates hundreds of jobs and demonstrates Montana's value of independence.

Renewable energy is important to me for many reasons. I believe that Renewable Energy will help the U.S.'s independence on foreign oil, especially in conflict areas. Locally, Montana has great prospects for wind power and could help bring tax money and jobs to the state. Lastly, renewable energy will help mitigate greenhouse gas effects and effects of fossil fuel drilling, mining, and refining. Renewable energy is especially important to me because I know how well it can help Montana's and the environment, as I am in a Associate's Degree, Energy Tech. Please oppose SB109, SB 330, and SB220 these bills will severely hinder Montana's renewable energy production.

Sincerely,

Zackary Rambo

esussky@student.umass.edu

Dear House Federal Retations, Energy and Telecommunications Committee,

I heard about the bill put forth by the republican party in Helena and have a lucky opportunity to respond now. I'm sure you, as well as me, and all of Montanans have been able to enjoy nature first hand given the State's beautiful and pristine landscape. I have grown up amongst tall, strong trees and along side one of the cleanest rivers in the world, the Swan River that runs in to Flathead Lake. Although this bill is not about conservation it has everything to do with it. Humans find themselves intricately woven in to the web of life, we influence it so greatly. Recently as in, within the 20th and 21st century we have pulled strongly on these strings. The earth was not made to support so many people and cars. We take too much from the land and don't give back - decomposition, sustainable farming etc. Now I am late for work, If only I could properly say how much sustainable energy means.

It is our chance to give back.

Sincerely, Lena Olson

827 Woody St. #7 Missoula MT 59801

Dear House Federal Relations, Energy, and Telecommunications Committee,

I would greatly appreciate if you voted in favor of renewable energy. Not only will it ~~create~~ be better for the environment, but it creates lots of greate jobs. So please oppose SB 109, SB 330 and SB 226, as these will hinder Montana's renewable energy production.

As your constituant, I would certainly hope you fullfill your duty of representing what your state's people (like me) want done

Thanks,

Neil Fleck

Dear House Federal Relations, Energy, and Telecommunications Committee,

I urge you to vote for renewable energy in the State of Montana. Renewable energy will provide numerous benefits for Missoula as well as the rest of Montana.

Renewable energy is important to me because foreign as well as domestic fossil fuels are resulting in numerous negative impacts socially, economically, and environmentally. I would much rather see a windmill than an oil rig.

Please oppose SB 109, SB 330, and SB 226, these bills will severely hinder Montana's renewable energy production.

Thank you for your services

Sincerely

Dear House Federal Relations, Energy, and Telecommunications Committee,

Please vote for renewable energy in the State of Montana. The Renewable Energy Standard helps dozens of businesses, creates hundreds of jobs and demonstrates Montanan's values of independence.

Renewable energy is important to me because the U.S. dependance on oil and non-renewable resources is getting out of hand. According to many people, the U.S. consumption of oil has peaked and there is no definitive amount of time left before we completely deplete the world's oil.

Please oppose SB 109, SB 330 and SB 226; these bills will severly hinder Montana's renewable energy production.

Thank You for your service,

Sincerely,

Diamond Braine

Dear House Federal Relations, Energy and ~~Tele~~ Telecommunications Committee,

Please vote for renewable energy in the state of Montana. The Renewable Energy Standard helps dozens of businesses, creates hundreds of jobs and demonstrates Montanan's value of independance

Renewable energy is important to me because the Earth is the best place in the Universe, and it pays to be efficient.

please oppose SB 109, SB 330 and SB 226; these bills will severely hinder Montana's renewable energy production.

Thank you for your service

Sincerely,

Jamie Runke
310 Mcleod Ave, Missoula, MT 59801

Dear House Federal Relations Energy, and Telecommunications

You should really, really vote to keep Clean energy goals in place. The thing is, we obviously only have a very finite amount of oil, coal, and natural gas as well. What happens when its gone? Are we just proverbally screwed? Or are we going to do something before.

Hindsight is always 20:20. Do I have to say "I told you so?" as our economy collapses, our defense is weakened, and our livelihoods are lost? I really hope not. I hope that you guys can protect Montana and set an example for the rest of America. That, that would be awesome. I'd really appreciate growing up in a cleaner world. That'd be awesome.

Thanks,

Kevin Bassett

Dear House Federal Relations, Energy, and Telecommunications Committee,

Please consider voting for renewable energy in Montana. Renewable energy is something that simply cannot wait. As a state we need to take the necessary, and difficult, steps now to create a better future. The longer we procrastinate the inevitable transition to renewable energy, the more difficult it will be when it is no longer a choice. Bills SB109, SB330, and SB226 are only putting off the responsibilities we face as citizens of Montana.

Thank you for your service,
