We Keep hearing claims of criminal activity but I'm here to tell you as a patient crime has decreased dramatically. Senator Milburn spoke of MT being the 2nd highest usage state but he failed to include population count, This failure negate any accuracy due to its questionable subjectivity. I was curious about the relevance of this limited information so I went out and asked providers if they'd supply me with medication and repeatedly was informed I wasn't their client so they couldn't ~~in~~ supply me, sounds like lawabiding citizens. The only reason statistics show increased usage of cannabis is because we have eliminated the Fear to admit it.

I

I Feel For the people afraid For their children but I implore you not to use our medication as an excuse For childs experimentation. If children are coming to school intoxicated call Child protective services This is not a medical cannabis issue but an education and parental involvement issue call the parents, educate don't regulate when I had cancer I laid in bed contemplating suicide daily even tried a few times. when I became a legal law abiding cannabis user, I got out of bed enrolled in college & three years later I stand before you law abiding moderately pain free & fairly happy if you pass this bill you will turn myself & thousands of others like me into a criminal Please let me have the life I've been building as a future social worker and not turn me into a criminal
