I have been a foster parent for several years now and I have fostered children with Cerebral Palsy, Post traumatic Stress Syndrome, failure to thrive and malnutrition, I have fostered children with lots of behavior problems, emotional problems, How would these kids ever survive without Medicaid? I would never have had the opportunity to foster if there was no medical care for these kids. I've never had a "bad" kid, but I have had plenty with physical + mental, developmental + emotional problems.

Please do not cut medicaid. At present I have a child age 4½ who attends Sp. Ed. pre-school. She doesn't walk or talk but does get Speech, Physical therapy and Occupational therapy I also have one who sees a counselor on a regular basis for PTSD due to severe sexual abuse as a toddler. Who is going to help those kids if you + I don't?

Please don't cut the foster care budget and keep the Medicaid in place.

Sincerely
Pat Roberts
