Attention: Senate Judiciary Committee

Re: HB 456

Planned Parenthood educators are well-trained, knowlegdeable, and work everyday to dispel myths and provide accurate information about sex education. sex education is a taboo subject within our culture and Planned Parenthood is a affordable resource for teens and young adults to recieve accurate information within a neutral enviroment. I have used planned parenthood services for birth control choices, vaccinations, and STD testing and information. I first went to a planned parenthood clinic because I had an STD and needed proper information about the STD and how to prevent an STD in the future. I was a teen at the time. since, I have been able to properly protect myself through knowlegde and available resources provided at Planned Parenthood.

Sincerely,

Jenna Brown
