Re: HB 456

I went to high school in Plains, MT and we had comprehensive sexual education, because of this I know that my school prevented many, many unplanned teen pregnancys.
It is so important to have correct information about contraception because without this vital information teens cannot make informed, healthy choises about sex.
Please, please leave the decision about sexual education up to the school districts because I know it made a huge difference in the lives of the 50 students I graduated high school with.
If we keep this choice up to the school boards legislators can work together to reduce the need for abortion in Montana.
PLEASE VOTE NO on HB456.
Please let your children succeed in life by giving them the tools to make informed decisions.

Sincerely,
Jessica Stugelmayer
