I am writing this email to support HB 519. HB 519 would clarify the current exemption water rights for small landowners trying to subdivide their land. I work with small homeowners in subdividing their properties through family transfers and minor subdivisions to lift sanitary restrictions on their created lots. This allows them to become more financially stable as well as give land to their relatives to help provide for their future.

Please pass HB 519 as it would provide the ability for homeowners to utilize their land and water rights in a non-detrimental way.

Sincerely,

J.J. Conner
