ENVIRONMENTAL QUALITY COUNCIL. 2013-14

January 8, 2014 Exhibit 15

we are The State of Montana, Not The County of Montana. A State is a country a sovereign country and we as a state should be in control of our own country.

What is wrong with freedom. freedom from an oppressive federal government That only is concerned with staying in power and extracting The wealth from The People.

we The People live here and it should only be up To us what we do with our Resources.

we do not have only say what other states Back east do in Their States, so why do all of The other states get to decide what we do within our own borders

I say sieze These hands and Throw The federalis out!!
