Prior to 2010, all revenue over 18 million board feet was appropriated to Timber Harvest for Technology and distributed to school districts. After 2010, all revenue over 18 million board feet was appropriated to the school facility and technology account and $1 million a year was appropriated from this account for distribution to school districts in proportion to school district BASE budgets. In addition to support from state special revenue, local districts contribute to their technology fund through local levies and local non-levy revenue.

The chart below shows the statewide revenues into school district technology.
