

**WHY ADEQUATELY FUND
INDIAN EDUCATION FOR ALL MONTANANS?**

Article X, 1 (2)

The state recognizes the distinct and unique cultural heritage of the American Indian and is committed in its educational goals to the preservation of their cultural integrity

**Supreme Court Decision – Nov. 9, 2004
– Unanimous Decision**

"We affirm the District Court's conclusion that the current funding system violates Article X, Section 1 (2), of the Montana Constitution in that the state has failed to recognize the distinct and unique cultural heritage of American Indians and has shown no commitment in its educational goals to the preservation of Indian Cultural identity."

**Jeffery M. Sherlock, District Court
Judge, Helena, April 19, 2004:**

"This Court hereby rules that the current state funding system violates Article X, Section 1 (2) of the Montana Constitution in that the State has failed to recognize the distinct and unique cultural identity.

"To have any meaning or effect, the Indian Education for all Act requires resources and programs, which in turn, require funding..... In reality, the State appears to be defenseless on Plaintiffs claim that Article X, Section 1 (2) of the Montana Constitution has not been implemented by the State despite the constitution's direction to do so."

**1972 – Two high school students from
Fort Peck – testimony at Con-Con**

"We hereby request the state of Montana to recognize the need for the inclusion and implementation of culturally sensitive curricula within the public education system adapted to the ethnic groups within the area of the school district. Most especially, we request that the curricula shall be relevant and sensitive to the native peoples residing in the State of Montana. We would like, very simply, our history, our culture, our identity."

Indian Education for All Montanans is:

...the only constitutionally mandated curriculum in Montana for the state's educational systems.

...meant for ALL students in Montana from kindergarten through college.

...insuring that all curricula reflect culturally appropriate American/Montana Indian content through an integrated curriculum.

...providing all schools with instructional resources to provide a quality educational curriculum that reflects American/Montana Indians.

...providing all teachers with adequate training both in college teacher preparation programs as well as school inservice to enable them to effectively integrate culturally relevant content and teaching strategies into their curriculum.

...Montana's educational systems reflecting the wonderful diversity of Montana's citizens.

School Renewal Commission **-Cultural Education-**

The Commission supports state-funded Indian Education for All curriculums and policies/rules developed through partnerships led by the Office of Public Instruction, Board of Public Education, and legislature, including Indian educators, tribes, and others. These partnerships will develop and implement:

- Policies/rules that support and insure that all schools provide the necessary guidance to the school instructional staff and programs to include culturally appropriate instruction for all students.
- Professional development for all school personnel to insure they are adequately prepared to provide instruction and supportive services for all students, including Indian students.
- Curriculum development and supportive instructional resources necessary to meet state accreditation guidelines as well as local district standards to integrate culturally appropriate American/Montana Indian Lessons in all curricular areas in grades K-12 for all students.
- Assessments standards that incorporate measurements for the achievement of all students and are tied to the goals of Indian Education for All.

These partnerships will provide educational opportunities to eliminate the wide disparity in educational achievement that exists between the American Indian students in Montana's Public Schools and their non-Indian peers as clearly documented by educational achievement research and data.
