

**American Cancer Society  
Supports SB 324  
The Affordable Rx Act**

The American Cancer Society is the nationwide community based voluntary health organization dedicated to eliminating cancer as a major health problem by preventing cancer, saving lives and diminishing suffering from cancer, through research, education, advocacy, and service.

The American Cancer Society set ambitious goals for significantly reducing the rates of cancer incidence and mortality along with measurably improving the quality of life for all people with cancer.

Meeting these goals requires a new partnership for the nation and will require a commitment from both the public and private sector.

The American Cancer Society understands the growing concern over the high-cost of prescription drugs.

The Society supports SB 324 because we believe it will increase access to affordable prescription drugs and provide information to empower constituents to make their own informed decisions on ways to reduce the cost of prescription drugs.

We recognize this bill will not cover all cancer patients in need we feel it is a step in the right direction.
