Voc. Reb. is playing a major role in my recovery from the brain injury that changed my life. I am a third generation Montana native. I was in a farming accident that left my college education not useable for employment. I was in a wheel chair when I first got out of the hospital, but with physical exercise and determination, I have walked away from my wheelchair. I have a permanent physical disability, but most of the time I can walk! I take entry level classes at Carroll College, to keep my mind active. My general level of physical condition will continue to decline, but my desire to keep my physical condition as good as possible will help keep me as active as I can for as long as I can. The assistance I receive from Voc Rehab. Is key to me maintaining my competitive employment as a file clerk for New York life in the Arcade Building,

Thank You

Gregory Engellant
