To Whom It May Concern:

My youngest grandchild is covered by the CHIPS program and has been since he was very young. At one point his parent's income was \$48 dollars over for Medicaid. I feel very grateful that he is covered by CHIPS. His parents and I want him to be healthy and one of those ways is to have medical insurance. Thank you for making that possible for Zachary and for other for children like Zachary that need this program so that they can be healthy!

Please keep this program progressing and developing for the needs of our young Montana children!

A very grateful grandmother!
