HOUSE JUDICIARY COMMITTEE

January 25, 2005

Re: HB238, Unborn Child Pain Prevention Act

Chairman Diane Rice and Members of the House Judiciary Committee:

My name is Charles Lorentzen from Kalispell, active in Pro Life issues, happy President Bush was re-elected and sad about the prospect of life for all Montana's unborn babies.

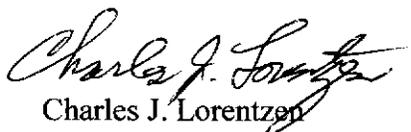

I urge you to vote **FOR** HB238.

There was a time when doctors sawed off limbs to save peoples lives and pulled teeth without pain medication. Today the use of anaesthetics is practiced worldwide, and I will consider that a beneficial advancement.

If we alleviate pain for hundreds of reasons in billions of people and all kinds of animals, and if we have the medical ability and moral will to extend this merciful service to unborn babies, we are simply barbaric not to do so!

The cost of the procedure will increase some, making the abortion rate decrease some, producing the desired effect from everyone's viewpoint that abortions should be rare in America.

Very Sincerely,

Charles J. Lorentzen
