**HARD SURFACE
 KITS**

- Innovative new tire and wheel kits for utility ATVs and the Kawasaki Mule line.
- Allows most popular utility and 4x4 ATVs into applications such as parking security, park maintenance, warehouse work, etc. Adds yet another dimension of versatility for utility ATVs.
- These long-wearing kits utilize high-mileage 185/70-14 or 195/70-14 4-ply all-season radial tire. Will last much longer than a typical knobby tire.
- Approximately 25" tall, each kit matches its application's specific O.E. gearing requirements.
- Provides a much smoother ride on hard surfaces than an O.E.M.-style knobby tire.
- The radial all-season tread offers less rolling resistance and should increase fuel mileage—lowering your operating costs!
- All Hard Surface Kits utilize 14x6 corrosion-resistant, Silver powder-coated ITP wheels.

— Wheels \$50 → 200
 — Over 10 pages of selection
