## Driver Education

### Teaching Your Teens to Drive

Traffic crashes are the number one cause of death and injury for people ages 15 to 20. This is a grim indicator of how important thorough, ongoing training is for teen drivers.

*Teaching Your Teens to Drive* is a complete program to help parents and other adults prepare young drivers to become safe drivers.

- The *Teaching Your Teens to Drive* program includes a video which offers step-by-step instructions with detailed live-footage lessons.
- An illustrated Parent/Teen Handbook accompanies the video, providing in-depth information that follows the sequence of the program video.
- A quiz is included at the end of each lesson.
- A Parent/Teen Agreement is included to be signed by the new driver and parent or experienced driving adult.

Together, the parent or adult and teen should view all 13 lessons before behind-the-wheel training begins. New drivers are encouraged to view lessons as often as necessary to master the skills presented.

The key to the program's success is parental or adult involvement. Adults are encouraged to:

- Share real life behind-the-wheel experiences that support the *Teaching Your Teens to Drive* lessons. This will dramatically increase the learning curve.
- Serve as a role model every time you get behind the wheel. Always buckle-up, obey the speed limit and drive safely.
- Praise and recognize the young driver's progress and responsible behavior.
