WE SUPPORT SENATE BILL 265

We believe that this bill does many good and needed things.

1. The electrical board needs to have more electricians on it so that it better understands the industry and makes educated decisions that will enhance the protection of Montana lives and property.
2. Strengthens statute for licensure & code enforcement so that the electrical board can legally pursue the hordes of handymen and bad actors that are presently endangering lives and property by doing unlicensed and shoddy electrical work.
3. Increases embarrassingly low fines for unlicensed practice so they will be a true deterrent.
4. Prohibits residential wiring on commercial projects because commercial buildings are being recycled/modified on a continuing basis and the use of residential wiring in these buildings is a growing industry concern.
5. Requires electrical contractors to place their license number on the sides of their vehicles so licensure enforcement officials/building codes inspectors are more able to enforce Montana's licensing statutes.
