Attachments:

Senator Cobb your plan is fine with us. I would suggest changing 2.e. to read: develop a continuum of care strategic plan for prevention, intervention, detoxification, treatment, other inpatient, and correctional services and facilities for special populations, for recovery, and for transitional services ~~to address the areas of need identified in the needs assessment~~

It's a shame we lost the money but we can certainly work with DOC on a planning process without new funds. Thank you for all your efforts to get this money for treatment. It's unfortunate that so many people think something must be done about meth use but are not willing to put any money toward it. At least the issue has had a good public forum and we can hope that our planning efforts will result in treatment dollars in the next session. We will be happy to support this new version of your bill.
