PTSF is responsible for setting standards and accrediting the  
designated hospital trauma centers in the State of PA**

**\*Certified instructor for the American College of Surgeons, Advanced Trauma and  
Life Support courses for more than 20 years**

**My message is simple:**

**Critical emergency services must be carried out without interruption. High  
quality service has always been the benchmark of healthcare professionals. The  
existing liability climate has diminished the willingness of qualified professionals to  
provide necessary services and many have or are considering the withdrawal of  
their services.**
