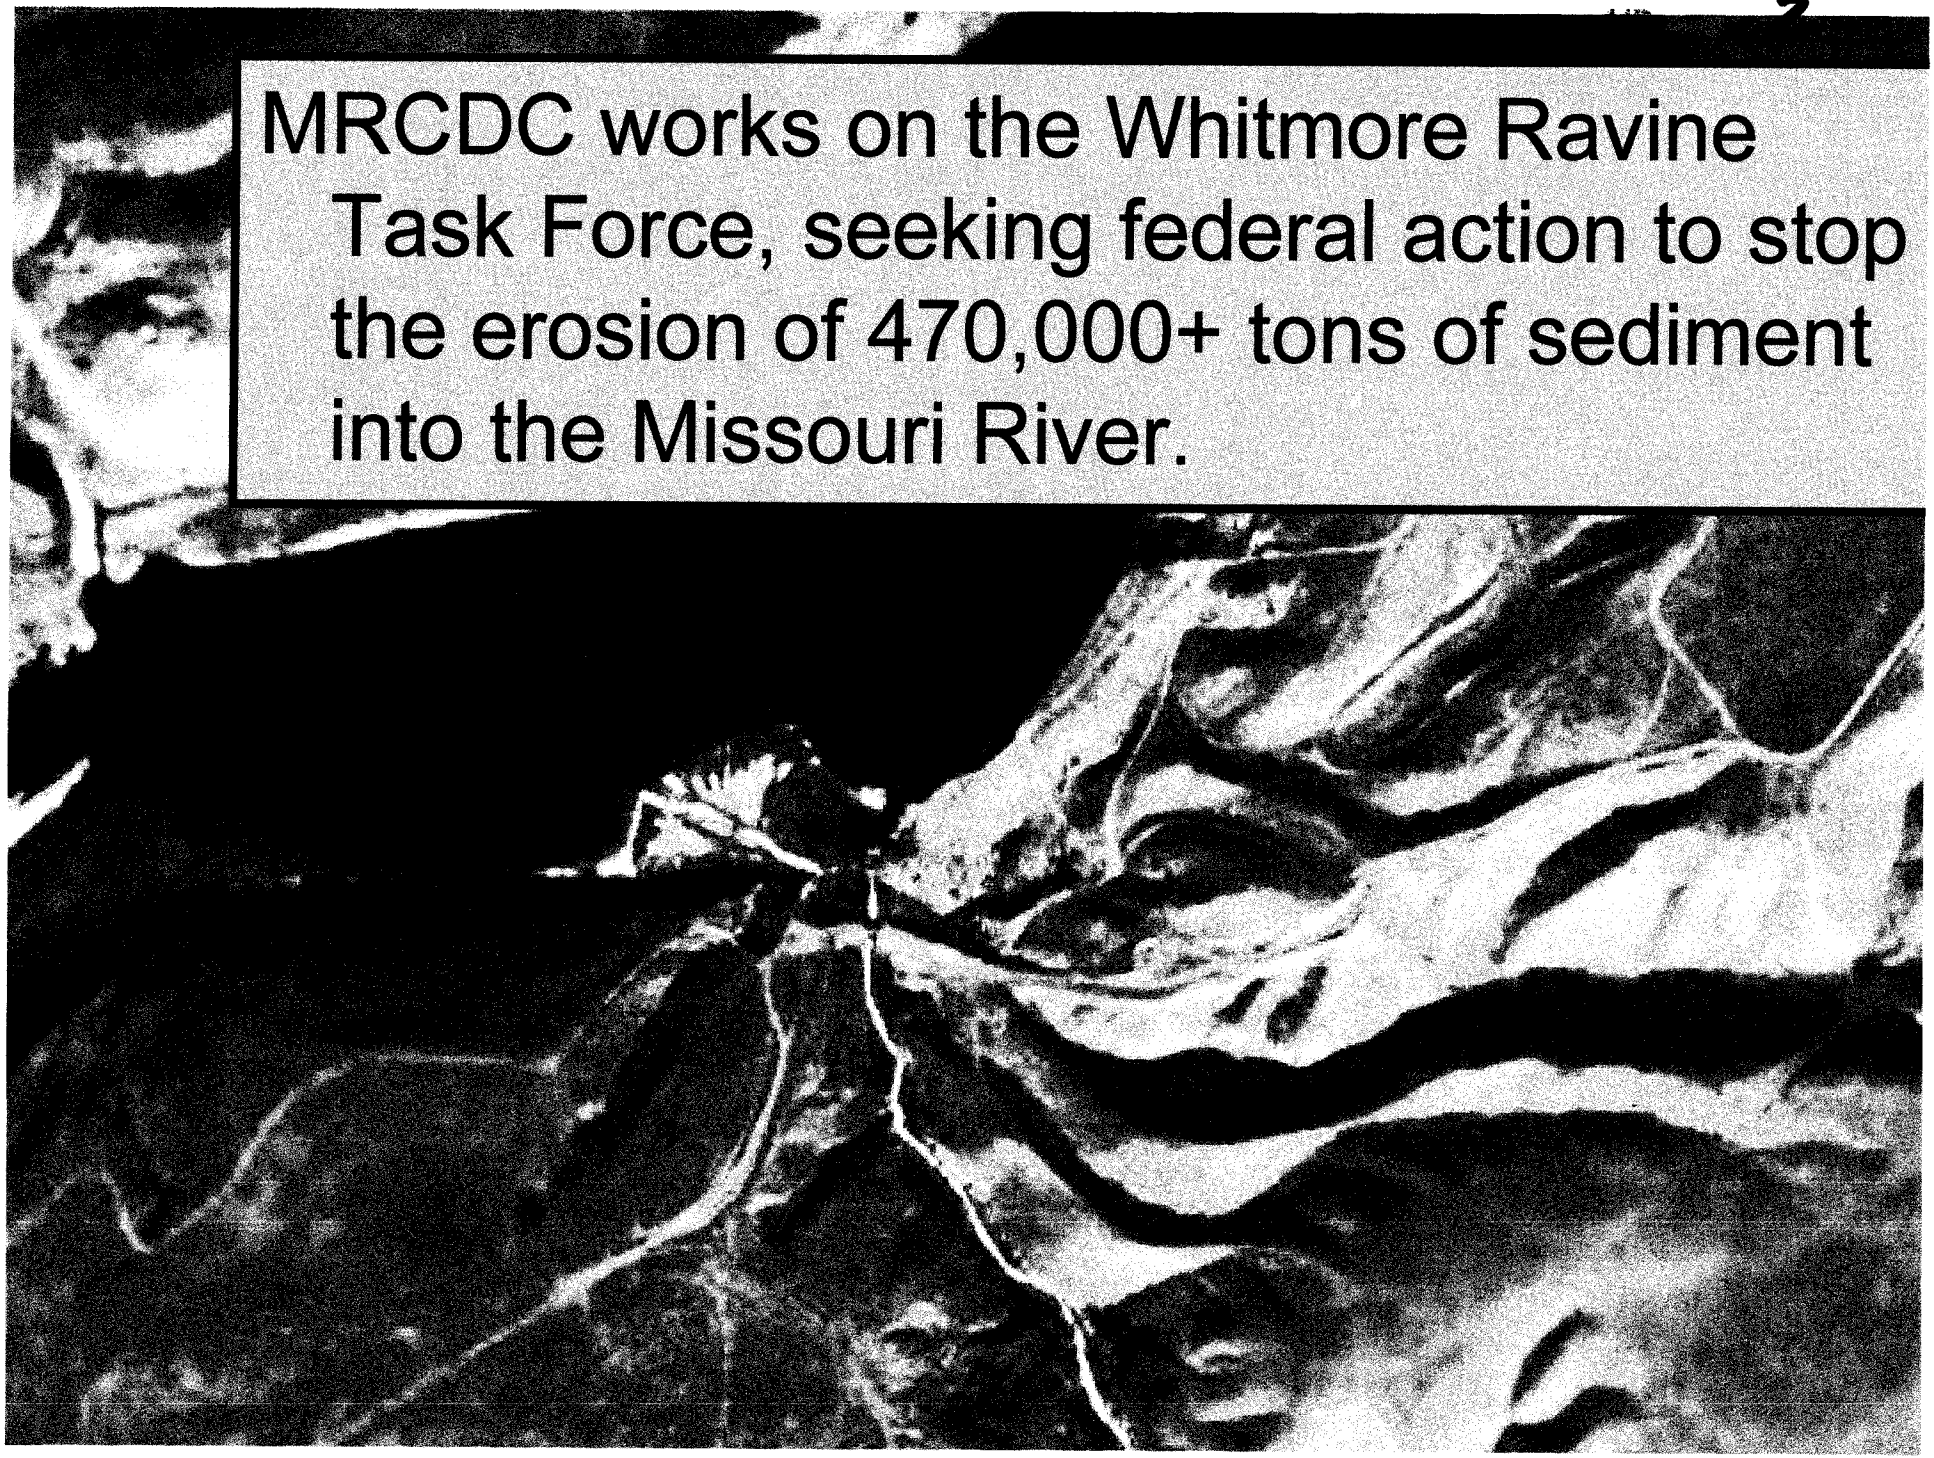
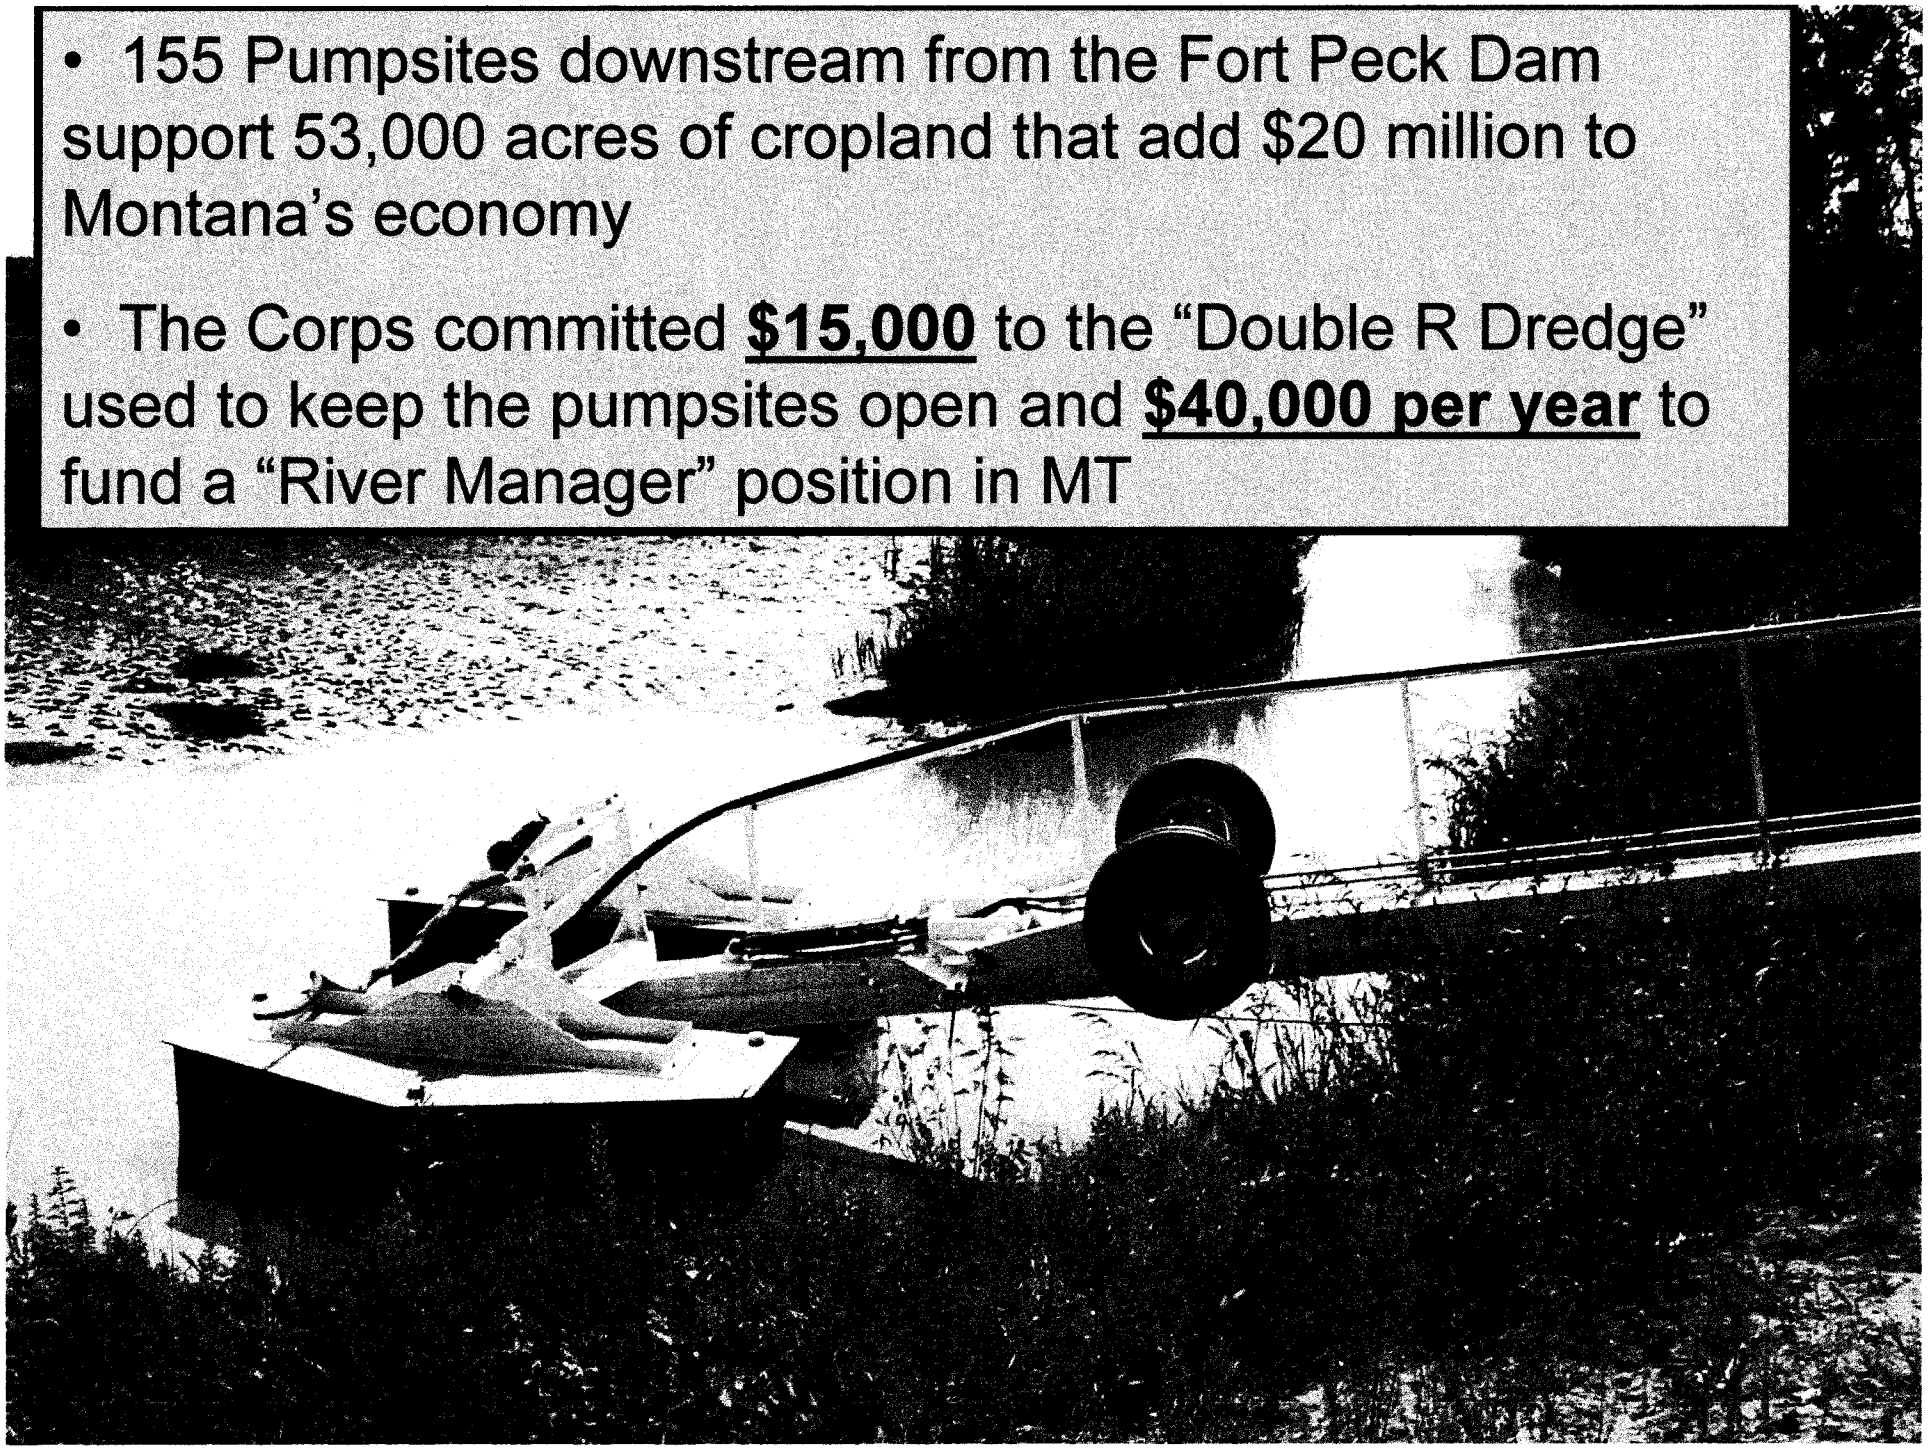
EXHIBIT 10
DATE 1-31-07



- The Missouri River Recovery and Implementation Committee (MRRIC) will advise the Corps on how to spend **$54.8 million** in recovery funding for endangered species (Interior Least Tern, Piping Plover, and Pallid Sturgeon below).

- MRCDC has participated in the MRRIC formation process and is ideally suited to represent Montanans on the committee.

- 155 Pumpsites downstream from the Fort Peck Dam support 53,000 acres of cropland that add $20 million to Montana's economy
- The Corps committed **$15,000** to the "Double R Dredge" used to keep the pumpsites open and **$40,000 per year** to fund a "River Manager" position in MT



The Conservation Reserve Enhancement Program (CREP) brings **$57 million** to the Madison-Missouri River corridor for conservation practices on 26,000 acres.

MRCDC has worked to modify the CREP, allowing more riparian areas to be enrolled.
