## The Fascinating Story of Life Before Birth

At no time in your life does more growth and change occur than in the first nine-months before birth. Here are the amazing milestones of that time in your life.

Day one:

**Fertilization!** All human chromosomes are present and a unique life begins. All the characteristics he or she will have as an adult are already determined - including eye color, skin pigmentation, sex and intelligence potential. This new and unique individual is no bigger than a grain of sugar.

21 days:

Heart first beats

30 days:

Child has grown 10,000 times to 6-7mm (1/4") long.

Week 6:

Brain waves can be detected. The child's mouth and lips are present and fingers are forming.

Week 7:

Spontaneous movement begins. Baby begins to hiccup, frown, squint, and move arms and legs.

Week 8:

**NAME CHANGED FROM EMBRYO TO FETUS.** All organs functioning stomach, liver, kidney, brain and all system intact. Heart beats sturdily. All future development of new life is simply that of refinement and increase in size until maturity at age 23 years.

Weeks 9 and 10:

Fetus squints, swallows, and retracts tongue.

Four months:

Our mother feels her child's movement and the excitement of the pending birth.

IN THE BEGINNING

My name is Rita Senkler  
Lake County Right to Life was born 37 years ago.

Because I was an unwanted child at the moment of conception, it is with deep emotion that I wrote these words, which could have come from the heart of an unborn child.

On this day my life began.  
All I'll ever be, I am at ..... at this moment.

Today, my heart beats steadily..  
It will until the day .....that I die.  
Someday I will speak my first word.....Mama;

.Today, my arms and legs are forming.  
And someday, Ill run with flowers I've picked.... To give to her.

Today, she knows I am here.  
She know that she.....is a mother.

Today, my heart stop beating.  
My mother brought me .....here to die.

There will be no coffin, no funeral, no grave side services.  
There will be just.....tiny body parts  
in a bag  
Tossed in a dumpster.....behind the clinic.

The words above could have been written by over 2000 babies who died of abortion in Montana in 2007..

There are only three times in history when personhood has been redefined....  
by the Supreme Court Dred Scott decision, by Adolph Hitler, and by Roe v Wade. Dred Scott died as a slave. .  
It took 150 years to truly overcome the Dred Scott decision.. .  
Today a person of African heritage is our president.

In every age, there are challenges to the dignity of human life.  
And so it is today with the unborn. Over fifty million babies have lost their lives since Roe.v Wade In Montana, we seek to define when live begins. Are you willing to take up the challenge of helping to make that happen?

Thank you for listening.
