BILL NO. FCC-HB658

Change in Property Taxes Paid by Dollars

House Bill 658 (as amended) Comparing Tax Year 2008 to Final Year of Phase-In

The following charts compare the estimated change in **property tax dollars** paid by residential property owners, statewide and by each county, as follows:

- The grey bars compare the dollars change from tax year 2008 to the final year of phase–in (TY2014) under ***current law***; and
- The red bars compare the dollars change from tax year 2008 to the final year of phase-in (TY2014) under ***House Bill 658 (HB 658), as amended.***

Assumptions Used in Creating the Charts

Tax rates and exemptions used in HB658 as amended:

Tax Year	Class 3 Agricultural Property Tax Rate	Class 4 Residential Property Exemption	Class 4 Residential Property Tax Rate	Class 4 Commercial Property Exemption	Class 4 Commercial Property Tax Rate	Class 10 Forestland Tax Rate
2009	2.85%	35.90%	2.85%	15.30%	2.85%	0.32%
2010	2.70%	37.40%	2.70%	15.50%	2.70%	0.30%
2011	2.57%	38.70%	2.57%	15.70%	2.57%	0.28%
2012	2.45%	39.90%	2.45%	15.90%	2.45%	0.26%
2013	2.35%	41.10%	2.35%	16.40%	2.35%	0.24%
2014	2.25%	42.00%	2.25%	16.60%	2.25%	0.23%

Constancy of taxable values

- The taxable value of all classes of property not subject to reappraisal is held constant in order to isolate the estimated change in taxes under HB 658 that is due to reappraisal (as shown by the red bars). Any tax dollar liability changes in the attached charts are, therefore, due solely to the change in valuations in the reappraisal classes and the policies reflected in the bill. There is no economic growth or mill levy growth reflected in this illustration.

How to Read the Charts

The grey bars represent the **dollars** change in residential property taxes paid under current law. The red bars represent the **dollars** change in residential property taxes paid under HB 658 as amended.

If the peak for the red bars is to the left of the peak for the grey bars, then the majority of taxpayers will pay less under HB 658 than under current law. If the peak of the red bars is to

the right of the peak for the grey bars, then a majority of taxpayers will pay more under HB 658 than under current law.

It is important to remember that these charts show **dollar** changes. ***Data analysis distributed earlier, which had GREEN bars was based on percentage changes.***

Determining Actual Property Taxes

For each residence, the property tax paid is impacted by two factors:

1) The change in value due to reappraisal; and
2) The change in mill levies applied to the value of the property.

As property values change, the tax base for local governments and schools also changes.

Mill levies for local governments (counties and cities) adjust to offset any increase or decrease in tax base value. Therefore, local government taxing jurisdictions receive the same amount of revenue regardless of the mitigation approach chosen.

Non-general mill levies of schools also adjust as the tax base changes. The amount of adjustment to permissive school mills is also limited under various sections in Title 20 of the Montana statutes.
