

Personhood begins at  
Conception

The humanness of the unborn child  
was known at the time of Roe v  
Wade—genetically separate from  
the mother, distinctly human,  
genome intact

The science of fetology  
exploded in the mid 1970s

- Hysteroscopy
- More sensitive ultrasound
- Electronic fetal heart monitoring
- EEG for fetal brain waves
- Radioimmunochemistry

The humanity of the unborn  
demonstrated

By classic dictionary definition, a  
human being and a person are the  
same thing

- based on science, technology, and is  
the only logical and humane stance

You don't have to be a member of a  
particular religion to know it's wrong to  
kill innocent human beings
