**Written Testimony for the Montana League of Women Voters for HB
152**

It is the position of the Montana League of Women Voters that this proposed legislation would place additional burdens on potential voters and possibly discourage some eligible individuals from voting. There are sufficient requirements in the law and election rules for officials to verify documentation provided for voter registration. At the 2004 MLWV convention, the League endorsed voting systems that are secure, accurate, securable, and accessible.
