Testimony Supporting SB27

Mr. Chairman and Members of the Committee:

My name is Joelle Selk. I have been a recipient of acupuncture treatments for past 15 years.

Acupuncture has been very effective in treating my hip and lower back pain, stimulating my immune system, and providing relief from allergy symptoms. I very much value this medicine and am grateful that it is available to me.

Licensed practitioners should have a representative on the Board of Medical Examiners to speak on behalf of their profession. I ask for your vote in support of this bill.

Thank you for the opportunity to comment.

Joelle Selk
