

Medicinal Mountain

DOCUMENT 33
DATE 3/11/11
NO. HB 161

Hello; my name is *Adan Perez*. **VOTE NO ON HB 161**. I am a caregiver in Kalispell. My wife has 3 pain diseases and is allergic to all narcotics. Living with a loved one who suffers so much has opened my eyes to the sad world of western medicine. This has driven me to make my medicine healthier and safer. I have developed one of the finest tinctures in the industry. Tinctures are by far the safest form of cannabis and I am proud and excited with every patient's success.

Have you seen the results for recent medical discoveries using cannabis? Please take the time to be educated. Look at all documented medical facts.

They have documented medical evidence of cannabis healing skin cancer (Melanoma). Using no radiation; no chemotherapy just CBD's (there are 56 know cannabinoids in the plant). *Are you educated enough about what CBD's do before you put it on the chopping block?* Please be educated before you vote.

Be strong; be a leader. VOTE NO on HB 161

Please support regulation not destruction.

You have an obligation to Montanan's; we voted you in to use your education and your knowledge to lead. Don't just fall in line and vote according to party or religious agenda's.

If our leaders do not lead... what future does modern medicine hold for you and your loved ones.

Thank you for your consideration,

Adan Perez, Kalispell
