

Hello; my name is *Jonathan Goodman*. I am a medical patient of cannabis and I vote.

Please VOTE NO on HB 161

Of course there are fundamental problems with the program. With no regulation it is no wonder that the industry has not gone in the right direction. Does mismanagement really mean that I may lose my rights as a Montanan?

Have you seen the results for recent medical discoveries using cannabis?

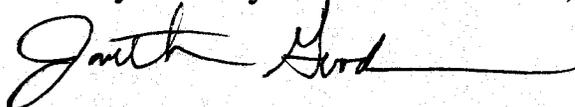

They have documented medical evidence of cannabis healing skin cancer (Melanoma). Using no radiation; no chemotherapy just CBD's (there are 56 known cannabinoids in the plant). It is exciting to know that everyday scientists are finding new safer medical uses for cannabis. Please be educated before you vote. Be strong; be a leader.

Please support regulation not destruction.

You have an obligation to Montanan's; we voted you in to use your education and your knowledge to lead. Please be the leaders we voted in. Don't just fall in line and vote according to party or religious agenda's.

**Please take the time to be educated.
Look at all documented medical facts.**

Thank you for your consideration,

Jonathan Goodman
