I fully support the passage of SB 117. Our national forests are falling apart for lack of management. Montanians do not have enough say in the management of the national forests at the local level. There is too much influence from people and organizations outside the local level by preservationists and people who are least affected by mismanagement of the resources throughout the national forests.

I truly appreciate your efforts.

Thank you.

Jim Rathbun, Forest Supervisor Kootenai National Forest, retired.
