Hi, I'm Mari. I'm sixteen i have schizophrenia. Well i think that there should be out patient care for kids. Because Personly I have been in shodiac 16 times. and it makes you feel uncomfortable. so I think and speaking for many kids that there definitly needs to be a place where kids can get treatment without being hospitlized, like a safe and secure place where you dont have to be strited or locked into. it would help alot of kids feel more comfortable. so I hope you liked my testamony I'm sorry be there I have other places to be thanks for listening.

Mari Antcliff
