This new proposal creates a restricted, one-time appropriation for the Insure Montana Program. The proposal removes \$10.9 million in tobacco tax health and Medicaid initiatives account funds from base budget expenditures, appropriates \$8.4 million in general fund and \$6.0 million in insurance fee state special revenue to continue the program through the 2015 biennium. The net impact of the new proposal reduces total funds by \$886,682 over the biennium.

The new proposal is based on the assumption that HB 48 passes, limiting eligibility for premium assistance to employees with household incomes under 400% of the federal poverty level.

Although the narrative describing the new proposal indicated that the general fund appropriation would be reduced by \$2,292,984 over the biennium if the Access Health Montana program is passed, there was no language proposed by the Office of Budget and Program Planning to implement that reduction.
