Seat No. 77

I am urging you to support HB 383. This is a result of the plan to put a bypass through a residential neighborhood. The definition of a BYPASS is a highway that circumvents areas of town to reduce congestion to residents and improves road safety hazards. This does neither. Please take 2 minutes and go to the website to see what is being impacted. This isnt a dozen homes, its 100s It spills 16,000 cars and trucks onto the north end of Main( which we have just finally decongested ), and by passes nothing as it does not go around the city and it does not connect into the airport. The goal is to get the interstate connected to highway 87 to Roundup and 312 to Shepherd, why would it not be placed further out of the city limits away from r-7000 zoning so in the future we can connect to the airport? The logic isnt here, and how are all of these homeowners going to be safe? How would you like to have your child pulling from your home into 70 mph traffic? The mere safety issues alone are reasons to support this bill. There are so many better options that make more sense for long term planning , why waste our dollars on something that doesnt accomplish our long term goals?
