

EXHIBIT NO. 8DATE: 3.6.13BILL NO. HB 239

House Bill NO. 239

Willard student's response to House Bill NO. 239

- "We need our right to knowledge, and freedom to learn."
- "I think we should keep Sex Ed. The way it is cause you can learn so much even if you have had sex".
- "I feel school should teach sex ed. in every year of middle school and High School
- "I think we need sex ed. so we know about birth control, condoms, and pregnancy."
- "Everyone needs to learn about sex ed. because everyone has or desires a certain type of sexual experience.
- "I think that people need to be informed at least more than two weeks."
- "I think they should teach it in school but not every single year and it will save parents time, they are already busy."
- "I think it should be the student's decision."
- "I think that sex ed. should be in the curriculum because the future generation should know much more than what people tell them."
- "I think sex ed should be required. It honestly did teach me so much!"
- "I believe that sex-ed should be in schools because I feel more kids will be informed about it as opposed to relying on getting the info. At home."
- "I think it is very important to have sex ed. in schools because it will stop a lot of unwanted teen pregnancy and they should do sign out because it makes more sense."
- "I think that sex education is important for students to take so they can have safe sex. It will reduce the about of STDs and pregnancy."
- "I want my kids to have sex ed in school. I don't want to have to give my kids that talk about the birds and the bees.
- "I think we should have sex ed. in schools, only opt out not opt. in. I know when I was in sex ed. no offence, but bible thumpers or even my mom who promised abstinence or said, "please don't have sex made me as well as others (classmates 6th-8th grade) wanted to rebel and go out and have sex. Kids will rebel against these rules and abstinence. Therefore increased TEEN pregnancy kids won't know to use condoms or about other health risks if all you talk about in sex ed is abstinence, kids will rebel and not know how to be safe."
- "I feel that my kids should be able to have sex ed. in school. People need to be informed with the right information. If people don't know how to be safe then they will probably get pregnant. I feel this bill is taking away our rights and it's unconstitutional."
- "We should continue to have sex ed. in school! I can't even begin to explain my frustration at the thought of them taking it away."
- "I think that this law is dumb because everyone has the right to do what they want with their body and that sex ed. should be taught to everyone because they need to know the effects of sex and STDs and the consequences of sex.
- "This is not okay because kids won't know what they are doing. They won't know the signs of pregnancy. Won't learn how to use condoms. We need sex ed. in schools."
- "I believe that you should have parent's approval."
