BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MONTANA:

Section 1. Section 37-68-103, MCA, is amended to read:

"37-68-103. Exemptions. (1) This chapter does not apply to the installation, alteration, or repair of electrical signal or communications equipment owned or operated by a public utility or a city. For purposes of this exemption, "communications equipment" includes telephone wire inside a customer's premises. This chapter does not prohibit a public utility from doing inside wiring to install, alter, repair, or maintain electrical equipment, installations, or facilities in buildings owned by the public utility if the work is accomplished by an employee who is a licensed electrician. If the building owned by the public utility is open to the public and the inside wiring constitutes major renovation or construction, the installation, alteration, repair, or maintenance of electrical equipment, installations, or facilities is subject to the permits and inspections required by law.

(2) The licensing or inspection provisions of this chapter do not apply to regularly employed maintenance electricians doing maintenance work on the business premises of their employer or to line work on the business premises of the employer when ordinary and customary in-plant or onsite installations, modifications, additions, or repairs are performed.

(3) This chapter does not require an individual to hold a license to perform electrical work on the individual's own property or residence if the property or residence is maintained for the individual's own use.

(4) An individual, firm, partnership, or corporation may apply for licensure as an electrical contractor if all electrical work performed by the individual, firm, partnership, or corporation is under the direction, control, and supervision of a licensed master electrician or under the direction, control, and supervision of a licensed

journeyman electrician for residential construction consisting of less than five living units in a single structure.

(5) A person who plugs in an electrical appliance where an approved electrical outlet is already installed may not be considered an installer.

(6) This chapter may not in any manner interfere with, hamper, preclude, or prohibit a vendor of any electrical appliance from selling, delivering, and connecting any electrical appliance if the connection does not necessitate the installation of electrical wiring of the structure in which the appliance is to be connected.

(7) This chapter does not require an individual to hold a license to perform electrical work involving 90 volts or less of alternating current or direct current."

Section 2. Section 37-68-316, MCA, is amended to read:
