# Montana Prescription Drug Registry (MPDR) Background

- The 2011 Montana Legislature passed HB83 which authorized the Board of Pharmacy to establish and maintain a prescription drug registry program to collect data on controlled substances that are dispensed to Montana residents
- Allows authorized health care providers to review a patient's prescription history for controlled substances and use that information as a tool to improve patient safety and enhance the quality of patient care when making health care decisions
- MPDR information can also be a tool to look for indicators of potential drug misuse, abuse and/or diversion
- Voluntary to use

# Prescription Data

- March 2012 pharmacies began reporting data to the registry
- October/November 2012 registered users began searching the online registry
- The program requires Montana licensed pharmacies to report controlled substance prescription data (Schedule II-V) to the MPDR database on a weekly basis
- Some pharmacies submit data on a daily basis
- Data is reported electronically and automatically uploaded into the database; generally searchable that day
- Indian Health Services and some Tribal Health agencies are voluntarily reporting to the MPDR; Veterans Affairs in progress

# Authorized Users

- Authorized users with direct online access to the MPDR:
  - Physicians and other health care professionals with prescriptive authority for controlled substances
  - Pharmacists
  - Designated representatives from Medicaid, Tribal Health, Indian Health, and Veterans Affairs
  - Board of Pharmacy authorized staff for administrative purposes
- Access requires authorized users to complete education and the online registration process
- Individuals can request a copy of their own prescription history as it appears in the MPDR
- State licensing boards and law enforcement are not authorized for online access, but may request MPDR information through an investigative subpoena
- Online access is at [www.mpdr.mt.gov](http://www.mpdr.mt.gov)

To search for prescription information, enter the following search criteria.

**i** NOTE: You will be logged out of the MPDR after 5 minutes of inactivity.

SEARCH TIPS: If you can't find your patient, try entering fewer search parameters. For example, try entering just the last name and first initial or the last name and birth date or simply last name. Note that your patient may appear under multiple entries; for example *John Doe*, *Johnny Doe* and *John Q Doe*. You will need to review all entries for your patient in order to see their full prescribing history. Click [How Do I](#) above for more tips on using this registry.

**Patient Search**
