How Calculated: Tons/acre: producers provide an estimate on the number of tons produced (from inspection report). In some cases producers list a range, e.g., 1.5 – 2.0 tons/acre. For pelleted products, the calculation is based on the number of labels sold/year, e.g., 119,800 and converted to tons. *These are estimates.*

Tons/Acre
2012: 22,724 tons
2011: 23,124 tons
2010: 29,191 tons
2009: 26,917 tons
2008: 27,104 tons

502,177 tons produced since program inception (1995 - 2012)
18 year average (1995 – 2012) is 27,899 tons per year

Pelletized product (2012) estimated at 2,995 tons a year

2012 Total acre and pelletized tons was 25,719
