Sonja,

So, as we look at this – seems like only question #31 applies. This will be our answer to that question....

Montana has a strong wind resource but does not have significant load so it is unlikely an out-of-state project will be affected by the Montana RPS. In-state projects will look more favorable.

Should I go through the formal survey process for this – or does this give you what you need.

Dear Renewable Energy Generator: The Montana Legislature is seeking your feedback concerning the Montana Renewable Power Production and Rural Economic Development Act. Since 2008, the law has required certain utilities to procure a percentage of their resources from renewable resources. As directed by [Senate Joint Resolution No. 6](#), the Energy and Telecommunications Interim Committee of the Legislature is focused on the economic impacts of the renewable portfolio standard, the environmental benefits of the standard, and the impacts the standard has had on Montana consumers. The committee is beginning its work by reaching out to renewable generators in Montana. Please take a few minutes to fill out the survey at the following link:
