A compliance audit is a component of the biennial financial-compliance audit. In these audits, the compliance and financial audits are combined for a two-year period to constitute the financial-compliance audit. Financial-compliance audits are classified as financial audits according to Government Auditing Standards. The primary objectives of the compliance audits are to determine compliance with regulations relating to contract and grant expenditures, other governmental financial assistance, and to test compliance with requirements of selected state laws, regulations, and rules. In performing the audit work, the audit staff uses standards set forth by the American Institute of Certified Public Accountants and the United States Government Accountability Office. Financial-compliance audit staff members hold degrees with an emphasis in accounting and most staff members hold Certified Public Accountant (CPA) licenses.

The Single Audit Act Amendments of 1996 and OMB Circular A-133 require the auditor to issue certain financial, internal control, and compliance reports in addition to those required by Government Auditing Standards. This individual agency audit report is not intended to comply with these reporting requirements and is therefore not intended for distribution to federal grantor agencies. The Legislative Audit Division issues a statewide biennial Single Audit Report which complies with the above reporting requirements. The Single Audit Report for the two fiscal years ended June 30, 2013, was issued March 28, 2014. The Single Audit Report for the two fiscal years ended June 30, 2015, will be issued by March 31, 2016. Copies of the Single Audit Report can be obtained by contacting:

Single Audit Coordinator

October 2015

The Legislative Audit Committee  
of the Montana State Legislature:

This is our compliance audit report of the University of Montana for the two fiscal years ended June 30, 2015. The audit focuses on compliance with federal requirements of the Research & Development and Student Financial Assistance federal assistance programs. We also test compliance with selected state laws, Board of Regents' policies, and state accounting procedures.

This report contains four recommendations related to federal student financial aid and research grant administration.

We thank the president and the university staff for their assistance and cooperation during the audit.

Respectfully submitted,

*/s/ Tori Hunthausen*

Tori Hunthausen, CPA  
Legislative Auditor

## COMPLIANCE AUDIT

### University of Montana

For the Two Fiscal Years Ended June 30, 2015

OCTOBER 2015

15-12

REPORT SUMMARY

Student enrollment at the University of Montana declined from 18,709 in fiscal year 2012 to 16,719 in fiscal year 2015. Most of the decline occurred in enrollment of Montana resident students. The enrollment drop caused the university to lose performance funding when several campuses did not achieve the student retention objective in fiscal year 2015. We considered these events and their impact when performing work at University of Montana campuses.

### Context

The University of Montana (university) consists of four campuses: University of Montana–Missoula, Montana Tech of the University of Montana, University of Montana–Western, and Helena College University of Montana. The campuses provide diverse programs leading to graduate, undergraduate, and associate degrees as well as occupational certificates.

During the audit, we examined the university's compliance with federal regulations pertaining to the Student Financial Assistance (SFA) and Research and Development (R&D) programs. Each campus has a separate SFA agreement with the U.S. Department of Education. We focused SFA federal compliance audit procedures on the University of Montana–Missoula (UM–Missoula), which distributed \$99.7 million or 38 percent of the \$262 million distributed in fiscal year 2014, the most of any campus in the Montana University System. The university also expended over \$90 million in federally funded research and development in the past two years, most of it at the Missoula campus. Consequently, we concentrated our audit effort in these two programs at UM–Missoula.

We also tested compliance with selected state laws and Board of Regents' policies at each university campus.

### Results

The report contains four recommendations to the university.

One SFA recommendation addresses noncompliance with exit counseling and grace period notice requirements for Perkins student loan borrowers. Another addresses timely reconciliation between amounts reported as disbursed to students for Direct Loans and Pell grants and the amounts actually disbursed.

The R&D issues concern the need to improve documentation of the review of grant financial activity required by UM–Missoula policy and questioned costs associated with an equipment purchase.

# Chapter I – Introduction

## **Audit and Objectives**

We conducted a compliance audit of the University of Montana (university) for the two fiscal years ended June 30, 2015. The objectives of the audit were to:

1. Determine the university's compliance with federal regulations applicable to the Student Financial Assistance (SFA) and Research & Development (R&D) federal programs, including its implementation of internal control over compliance to the extent required by federal regulations.
2. Determine the university's compliance with selected state laws, regulations, and Board of Regents' policies.
3. Provide recommendations for improvement in management and internal controls.
4. Determine the implementation status of prior audit recommendations.

In this audit, we examined the university's compliance with federal regulations governing the SFA and R&D programs. We focused our audit efforts on SFA at UM–Missoula, which comprised 38 percent of the Montana University System total in fiscal year 2014. We concentrated our R&D efforts at UM–Missoula, which expended 95 percent of the total expended at all UM campuses. We also tested selected state laws and Board of Regents' policies at each of the campuses we visited during the audit. The state laws addressed bonding requirements and purchasing. Regents' policies covered Personnel, Compensation, and Information Technology.

## **University of Montana–Campuses**

In the current organizational structure of the Montana University System, the University of Montana is one of two universities with four campuses. All campuses are accredited by the Commission on Colleges of the Northwest Association of Schools and Colleges. The four campuses of the University of Montana provide a diversity of undergraduate and graduate academic degrees.

## **University of Montana–Missoula**

The University of Montana-Missoula campus offers four-year undergraduate programs along with masters and doctoral graduate programs. It includes professional schools and significant research activities. The university operates the only law school in the system. Other schools/colleges include Humanities and Sciences, Business Administration, Education and Human Sciences, Visual and Performing Arts, Forestry and Conservation, Health Professions and Biomedical Sciences, Extended and Lifelong Learning, Honors, Graduate, and Journalism. In addition, the university

includes a two-year college, which provides a broad range of technical and occupational education and training courses. Missoula College and Bitterroot College students receive either a certificate of completion or a two-year degree upon completion of a program.

### **Montana Tech of the University of Montana**

Montana Tech of the University of Montana provides a variety of four-year and graduate programs with a focus on mineral, geological, environmental, petroleum, mining, and other engineering and science programs. It also includes the Highlands College, which provides core education courses and two-year degrees in various occupational and technical programs.

### **University of Montana–Western**

The University of Montana–Western provides undergraduate degrees in a number of liberal arts, professional, and preprofessional areas using a unique scheduling system in which students take one class at a time.

### **Helena College University of Montana**

The Helena College University of Montana is a two-year college offering 32 credentials in 14 different areas, as well as general transfer degrees and a variety of learning opportunities in personal enrichment and customized training.

### **Enrollment and Staffing**

In fiscal years 2014-15 and 2013-14, the University of Montana had full-time equivalent (FTE) student counts of 16,719 and 17,139, respectively. As shown in Table 1 (see page 3), since fiscal year 2011-12, the university's FTE has declined 1,990. Of that decrease, 1,961 consisted of resident students and 1,819 occurred at UM–Missoula.

## University of Montana Funding

The level of state support for the Montana University System (MUS) is determined by the Montana legislature. The legislature appropriates state funds, comprised of general fund and six-mill levy revenues, in a lump sum for the educational units and all other higher education programs except the research and public service agencies, community colleges, and tribal college assistance programs. The Board of Regents allocates the lump sum state funding to the various programs and campuses. The Board of Regents' allocation formula is based upon resident enrollment and certain base fixed costs of each campus.

In fiscal year 2015, the legislature designated \$7.5 million of appropriation as performance funding. The Board of Regents approved the allocation of performance funding between MUS campuses based on student completion of programs and retention of first year enrollees. UM–Missoula, Montana Tech–UM, and Helena College did not improve student retention. As a result, these campuses, as a group, received \$663,702 less than the initial budget allocation to them because the retention objective was not met.

### **Prior Audit Recommendations**

The prior financial-related (compliance) audit of the University of Montana for the two fiscal years ended June 30, 2013, contained five recommendations. The university implemented four recommendations and one recommendation is no longer applicable. Chapter 73, Laws of 2015, repealed the statutory limit on fee waivers for nonresident students, so the recommendation to comply with the limit is no longer applicable.

## Chapter II – Findings and Recommendations

### Research & Development Grants

The University of Montana–Missoula’s Office of Research and Sponsored Programs (ORSP) manages research and development grants and contracts from federal, state, and private sources. Grant management includes oversight over the application process, accounting, compliance, and financial reporting associated with grant activity. Of the grant expenditures incurred in fiscal years 2013-14 and 2014-15, approximately \$95 million were funded from federal sources over the two-year period. The following two sections discuss issues related to grant management.

### Quarterly Expenditure Review

---

**The university can improve documentation of its grant expenditure review to decrease the risk of unallowable charges to federal grants remaining undetected.**

---

The Office of Research and Sponsored Programs represented that grant expenditure reports, both summary and detail, are run monthly and reviewed at least quarterly by grant accountants. Although ORSP procedures required a quarterly review of expenditures for open grants, we identified 6 grant fund files of the 32 sampled that lacked evidence of review required by ORSP procedures for the quarter tested. Although we confirmed by interview that one review had been performed, and by inspection that three grants had no expenditures in the quarter tested, lack of documentation makes it difficult for management to monitor compliance with ORSP policy. If expenditure reviews do not occur, risk of unallowable expenditures being charged to a grant and not being detected increase.

University management stated the procedure describing staff review of grant expenditures does not specify how the review is to be documented. By not specifying how to document the review in its procedure, management cannot determine whether staff have completed the reviews required by internal procedure. We could not confirm from inspection of the files whether the reviews not documented had actually been performed.

---

#### **RECOMMENDATION #1**

*We recommend the University of Montana-Missoula implement procedures to document the quarterly review of grant expenditures.*

---

## Equipment Purchase

---

**The university purchased equipment with federal funds when equipment costs were not permitted by the grant agreement.**

---

Federal regulations state that the auditee shall comply with laws, regulations, and the provisions of contracts or grant agreements related to each of its federal programs. We tested 11 grant expenditures in excess of \$25,000 at the University of Montana–Missoula. The university purchased equipment related to research funded by one federal grant. The terms of the grant agreement listed the purposes for which the grant funds could be spent. The listed purposes did not include equipment, so the equipment purchase was not an allowable charge to the grant. As a result, we question costs of \$48,997 charged to the grant.

University staff said the university filed a request with the grantor agency in January 2014 to carryover funds to the next year for equipment related to the research funded by the grant, but the request was not approved until February 2015. In April 2014, the University of Montana–Missoula purchased equipment after the equipment in use for the grant-funded project failed. According to university personnel, the grant work could not continue without the equipment, so a replacement was ordered and charged to the grant.

Federal regulations require prior approval to use funds for purposes other than those stated in the grant agreement. Although the request was eventually approved, the university did not have authority to purchase equipment with the grant funds at the time the equipment was purchased.

---

### ***RECOMMENDATION #2***

*We recommend the University of Montana-Missoula limit charges to federal grants to activities allowed under terms of the grant agreement.*

---

## **Federal Student Financial Aid**

The University of Montana administers federally-funded student financial assistance programs. These programs provide financial assistance to students pursuing postsecondary education. Although each campus has a separate financial aid agreement with the U.S. Department of Education, we limited audit procedures to the University

of Montana–Missoula, which distributed 38.26 percent of the state’s federal financial aid in fiscal year 2014, the most of any campus in the Montana University System.

Federal financial aid consists of grants, loans, and work study employment and is awarded to students based on financial need. The Pell Grant Program provides grants primarily to undergraduate students. The Federal Direct Student Loan Program makes interest subsidized or unsubsidized loans available to students, or PLUS loans to graduate or professional students or parents of dependent students. The Perkins Loan Program provides long-term, low-interest loans to undergraduate and graduate students from a revolving loan fund initially funded with federal and state contributions and replenished with repayments of principle and interest on previously awarded loans.

Each of the programs described above have federal compliance requirements, and federal regulations require the university to establish and maintain internal controls at each campus to reasonably ensure compliance with the program requirements.

During our audit, we identified issues pertaining to Perkins loan due diligence procedures with borrowers and disbursement records for Direct loans and Pell grants, which are addressed in the following two sections.

## **Loan Due Diligence**

---

### **The University of Montana–Missoula can improve compliance with borrower exit counseling and payment notice requirements for Perkins loans.**

---

The University of Montana–Missoula (UM–Missoula) contracts with a third party to perform required due diligence contacts with borrowers to minimize risk of student default on its Perkins loans. Federal regulations require that exit counseling be conducted with each Perkins loan borrower either in person, by audiovisual presentation, or by interactive electronic means, shortly before the borrower ceases at least half-time study at the institution. In addition, federal regulations also require UM–Missoula to contact the Perkins loan borrower three times within the initial nine month grace period. These contacts must occur 90 days, 150 days, and 240 days after the commencement of any grace period.

We noted instances where exit packages were not distributed and grace period notices were not sent for students that separated from the university. In our sample of 25 student accounts, we identified 5 students who did not receive exit packages and 9 students who did not receive all the required grace period notices. Students enter payment status each time they leave school or course enrollments fall below one half the credits required for full time status. The identified exceptions occurred in the

2013-2014 academic year when students separated from the university unexpectedly. UM–Missoula did not discover the lack of exit packages or grace period notices for the identified students prior to our communicating with them regarding the issue.

UM–Missoula is not in compliance with federal regulations requiring exit conferences and grace period notifications for students entering Perkins loan payment status. UM–Missoula personnel said noncompliance occurred when the actual date a student separates from the university differs from the estimated date of separation for that student. The contractor hired by UM–Missoula to ensure exit counseling information and grace period notices are sent to each student with a Perkins loan has an estimated separation date for the student on its computer. These separation dates are updated based on the student’s activity at UM–Missoula. When the system uploads actual separation dates from the federal clearing house and the actual separation date for a student is greater than 30 days before or 30 days after the estimated date that is already in the system, the system does not automatically flag the student for exit counseling or for sending grace period notices. UM–Missoula can enhance compliance by ensuring timely communication of changes in student separation dates.

---

***RECOMMENDATION #3***

*We recommend the University of Montana–Missoula implement improvements in its control procedure to ensure Perkins loan exit counseling and grace period notice generation occurs in a timely manner pursuant to federal regulations.*

---

## **Differences Between Aid Disbursements and Federal Reimbursements**

---

**The University of Montana–Missoula can improve its compliance with federal regulations requiring federal reimbursements for Direct loan and Pell grant aid to match aid disbursements to students documented by the university.**

---

Federal regulations for Direct loans require UM–Missoula to ensure the student’s loan amount, the anticipated and actual disbursement date or dates, and disbursement amounts are complete and accurate. Federal regulations also require UM–Missoula to report any change in the amount of a Pell grant for which a student qualifies, including any related payment data changes by submitting the student’s payment data that discloses the basis and result of the change in award for each student.

UM–Missoula received multiple notices from the Department of Education’s Common Origination and Disbursement (COD) system that identified instances where amounts reimbursed for a Direct loan or Pell grant exceeded the amount disbursed for the same aid for more than 30 days. These differences usually occur when the student decides to accept less loan or grant aid than initially awarded by UM–Missoula. These differences are referred to as unsubstantiated balances. Although UM–Missoula had not implemented a procedure to identify these unsubstantiated balances within the 30-day period allowed by federal regulations, the university remitted funds to the Department of Education for the federally determined unsubstantiated amounts. When COD monitoring notices were received, UM–Missoula returned cash for the amount by which the original reimbursement exceeded the amount disbursed to the student. We identified one instance in academic year 2013-2014, and three instances in academic year 2014-2015.

UM–Missoula personnel reconcile between the Department of Education Direct loan files and the state’s financial aid files, but the reconciliation is not completed in time to detect each difference within 30 days. A financial aid manager delivers the COD notices directly to the financial manager who draws federal cash, but not to the person performing the reconciliations. The communication gaps constitute a systemic weakness in design of the university’s internal control to reconcile federal awards and disbursements for each student within 30 days.

---

***RECOMMENDATION #4***

*We recommend the University of Montana–Missoula enhance communication between staff charged with monitoring and correcting discrepancies between loan funds disbursed to a student and the amount recorded as reimbursed with federal funds.*

UNIVERSITY OF MONTANA

UNIVERSITY RESPONSE

October 7, 2015

Ms. Tori Hunthausen  
Legislative Audit Division  
Room 135 State Capitol  
P. O. Box 201705  
Helena, MT 59620-1705

RECEIVED  
OCT 13 2015  
LEGISLATIVE AUDIT DIV.

Dear Ms. Hunthausen,

On behalf of the University of Montana community, I want to extend our appreciation to you and the Legislative Audit staff for their work on the University of Montana's Compliance Audit for the two fiscal years ending June 30, 2015. We always find this process to be helpful in reviewing our controls and systems and the work by the Legislative Audit staff has been professional and conducted in a cooperative manner. The University takes accountability and compliance with applicable rules and regulations with the utmost importance.

Again, thank you and your staff for their assistance and attentive efforts.

Sincerely,

Royce C. Engstrom  
President  
University of Montana

RCE/rp

Cc: Clay Christian, Commissioner of Higher Education

Office of the President

# University of Montana

## Response to Legislative Audit Division Compliance Audit

For the Two Fiscal Years Ended June 30, 2015  
October 8, 2015

### **RECOMMENDATION #1**

**WE RECOMMEND THE UNIVERSITY OF MONTANA-MISSOULA IMPLEMENT PROCEDURES TO DOCUMENT THE QUARTERLY REVIEW OF GRANT EXPENDITURES.**

**The University concurs with the recommendation.** As soon as the auditors raised their concern, the University modified the internal departmental procedures. The procedures clarify how employees must document their quarterly reviews.

### **RECOMMENDATION #2**

**WE RECOMMEND THE UNIVERSITY OF MONTANA-MISSOULA LIMIT CHARGES TO FEDERAL GRANTS TO ACTIVITIES ALLOWED UNDER TERMS OF THE GRANT AGREEMENT.**

**The University concurs with the recommendation.** Effective September 2015, the Office of Research and Sponsored Programs implemented an emergency purchase procedure to address the situation as outlined in this finding.

### **RECOMMENDATION #3**

**WE RECOMMEND THE UNIVERSITY OF MONTANA-MISSOULA IMPLEMENT IMPROVEMENTS IN ITS CONTROL PROCEDURE TO ENSURE PERKINS LOAN EXIT COUNSELING AND GRACE PERIOD NOTICE GENERATION OCCURS IN A TIMELY MANNER PURSUANT TO FEDERAL REGULATIONS.**

**The University concurs with the recommendation.** Beginning in fall 2015 semester, the University will implement a supplement procedure to ensure Perkins loan exit counseling and grace periods notifications will be sent in accordance with federal regulations.

### **RECOMMENDATION #4**

**WE RECOMMEND THE UNIVERSITY OF MONTANA-MISSOULA ENHANCE COMMUNICATION BETWEEN STAFF CHARGED WITH MONITORING AND CORRECTING DISCREPANCIES BETWEEN LOAN FUNDS DISBURSED TO A STUDENT AND THE AMOUNT RECORDED AS REIMBURSED WITH FEDERAL FUNDS.**

**The University concurs with the recommendation.** The University Business and Financial Aid offices have begun discussion to gain a greater understanding of each offices roles and responsibilities and the data available in the various systems. In FY 16, the offices will modify existing procedures to provide more timely information and resolution of discrepancies between the systems.
